

A SCREAM OF JOY ENDS PORTOLA

The San Francisco Festival Closes With Final Burst of Delirious Merriment.

PAGEANTS SHOW HISTORIC SCENES

Oriental Features of Illuminated Parade Were Remarkably Picturesque—Various Sports of the Day

SAN FRANCISCO, Oct. 23.—San Francisco's streets were one vast ball room tonight and the flying feet of thousands of revelers made the harbor lights like brilliant stars as they glided through the waves of confetti at the seven stationary floats from which as many hands sent forth strains whose dying echoes marked the close of the Portola festival.

Almost a million people crowded the sidewalks as the parade of illuminated floats passed in review. In these floats San Francisco outdid her reputation for love of pageantry, and the floats were weighed upwards of 12,000 pounds and all were on a scale of magnificent splendor.

California's history from the discovery of San Francisco Bay by Portola to the discovery of gold were set forth in graphic scenes. The building of the Central Pacific and the driving of the last spike by Leonard Stanford, portrayed on the float by students from Stanford University, the gambling hall and the pioneers and floats emblematic of the state, stirred the crowd to volleys of applause.

One of the most striking of the scene floats was that showing the Yosemite with its "frowning cliffs" over which real water fell in cascades. The "discovery of the North Pole," with both Peary and Cook pulling the flag to the "great nail," had for decorations huge cakes of ice, the whole illuminated by 150 incandescent lights. The float formed the end of the procession and after it had circled around which the merry-making rose to a seven-fold climax.

Until the parade had passed, the crowd was confined to the sidewalks by the police, but the moment it was released the bounds of the city were filled from wall to wall with a throng of confetti throwing, cheering and laughing people, determined that the carnival should be prolonged while they could breathe.

ORIENTAL FEATURES.

Again the Oriental colonies of the city exerted themselves to take fitting part in the celebration. The float representing the parade by several scores of "young Japan" waving American flags from beneath an orchard of cherry trees.

Seven floats and almost 2,000 attendants, including bands of music and floats in costumes that revealed the rainbow, made up this section of the parade was a dozen illuminated fish-shaped lanterns, the fire-breathing dragon and a Chinese figure representing the dragon which the attendants teased and tickled with a feather duster.

Of the alcoholic fruits, agriculture, the California poppy and the purple hugh of plenty were beautiful concepts of the artist, while one of huge roses in bloom, each sheltering in its heart a pretty girl, was loudly cheered. Queen Vergilia made her way through the clamorous throngs in a majestic float representing the steps of a throne from which, twenty feet up in the air, the queen nodded greetings.

"CALIFORNIA SUNSHINE."

California sunshine was typified by a heroic figure which held two lighted globes, shedding their beams upon the products of the state as portrayed by a group of appropriately garbed young women.

At seven corners of Market street were stationed the enormous floats that were later to serve as bandstands. Beside the Yosemite and the North Pole, the other subjects were Chinatown with forty-foot dragons guarding the base, in which were mounted a pagoda and a tea garden; Miss San Francisco was a gorgeously attired female figure reclining in a seashell before which played an electric fountain; Mount Shasta and Mount Brice Falls were shown with real water cascades; the Mission float was a counterpart of the Santa Barbara mission with a grape arbor roof garden for the missionaries dressed as Spanish conquistadores; and a mighty redwood tree covered for the base of the March of the Mariposa float which also bore two gigantic horses and its band of musicians.

During the day, many events scattered the crowd, some to the bay to watch the regatta, others to the stadium or to the tennis courts, while Union square was crowded with thousands who listened to the band concert. But at night not even the fireworks display could drag a corporal's guard away from the street where was the real feature of the carnival.

KILLS JEALOUS HUSBAND

CHARLOTTE, Wyo., Oct. 23.—At the urgent request of both prosecution and defense, the Ten Sleep murder, in which seven prominent cattlemen are charged with the murder of three sheep men, Judge Farnham has ordered an investigation of the grand jury and jury list. It is charged that eighty-two names were fraudulently from the jury list and substituted from the jury box.

JURY SCANDAL IN WYOMING

RABIN, Wyo., Oct. 23.—At the urgent request of both prosecution and defense, the Ten Sleep murder, in which seven prominent cattlemen are charged with the murder of three sheep men, Judge Farnham has ordered an investigation of the grand jury and jury list. It is charged that eighty-two names were fraudulently from the jury list and substituted from the jury box.

DISSENSION OCCURS IN W. C. T. U. RANKS OVER LOCAL OPTION

OMAHA, Oct. 23.—The first important dissension in the thirty-six national convention of the W. C. T. U. occurred today over the proposition to endorse the action of the Nebraska division in its stand for "county option," which Mrs. Frances Beauchamp of Kentucky considered a compromise with the liquor interests.

The trouble resulted from an attempt of the Nebraska division to secure from the national organization an endorsement of its action in supporting a proposition for county option as against state-wide prohibition.

The convention, despite Mrs. Beauchamp's protest, endorsed the position taken by the W. C. T. U. of this state.

RUSSIA MAY SELL MANCHURIAN LINE

Meeting Between Finance Minister and Prince Ito Considered as Important

ST. PETERSBURG, Oct. 23.—Russia may dispose of her Manchurian railway lines, according to the meeting between the finance minister and Prince Ito, which was held here today.

The subjects to be discussed were not mentioned by the Japanese press, but it was reported that the meeting was of great importance.

The subjects to be discussed were not mentioned by the Japanese press, but it was reported that the meeting was of great importance.

OKLAHOMA COTTON CONCERNS INDICTED

Some of the Most Prominent Men in the State Affected by Anti-Trust Law Charges

OKLAHOMA, Oct. 23.—Charged with violation of the federal and state anti-trust laws, the largest cotton purchasing, financing and oil mill concerns of Oklahoma were indicted this afternoon.

The following are indicted: W. H. Coyne, Consolidated Oil company; Guthrie, W. H. Coyne Oil Mill company; Guthrie, Houghton and Douglass; Guthrie, Southwestern Cotton Oil company, Oklahoma City; the Hawthorne Oil company; W. H. Coyne, E. E. Houghton, E. Cook and A. T. Houghton, all of Guthrie; W. A. Voss, Oklahoma City; and W. O. Garbano, Crescent.

The indictments will, it is said, affect seventy-five persons, including some of the most prominent men in the state. They were returned following a grand jury investigation which has been pending under the direction of Attorney General West of Oklahoma.

HAZEL HOTCHKISS SUFFERS DEFEAT

Losses to May Sutton in Easy Fashion; Wins from the Champion in Doubles.

SAN FRANCISCO, Oct. 23.—Miss May Sutton, the world champion of the world, defeated Miss Hazel Hotchkiss, woman champion of the United States, in hollow style this afternoon in two straight sets, 6-1, 6-1, as the star event of the Portola tennis tournament.

The sting of the easy defeat was taken away by a special prize won by Miss May Sutton in a special tennis over the Southern Pacific tonight. The street railway men are making an extended tour of the United States, after attending the annual convention of the American Street and Interurban Railway Association in Denver.

RAPID TRANSIT MEN ARE ON TRIP

LOS ANGELES, Oct. 23.—A party of about eighty persons, consisting of presidents, general managers, engineers and other representatives of the electric railroads of Massachusetts and their wives, arrived here in a special train over the Southern Pacific tonight. The street railway men are making an extended tour of the United States, after attending the annual convention of the American Street and Interurban Railway Association in Denver.

2000 PEOPLE DENOUNCE ARREST

Mass Meeting Held in Los Angeles Opposes Return of De Lara to Mexico.

JOHN K. TURNER AMONG SPEAKERS

Former Superior Judge Characterizes Action of Federal Officials as Without Warrant of Law.

LOS ANGELES, Oct. 23.—A mass meeting held here at Simpson Auditorium tonight, speeches protesting against the proposed deportation of L. Guadalupe De Lara to Mexico were made by prominent Los Angeles citizens including Judge John K. Turner, former superior court judge. A collection was taken to assist in defraying the expenses of De Lara's defense, and resolutions were adopted.

Mrs. De Lara, the American wife of the imprisoned Mexican attorney and author, was given an ovation by the 2,000 persons present when she was introduced by Rev. Reynold E. Blight of the Los Angeles Fellowship, who acted as chairman of the meeting.

The first speaker of the evening was John Kenneth Turner, author of "Barbarous Mexico," now appearing in serial form, who was guided through Mexico by De Lara. Turner said that the deportation of De Lara meant death for the man, and that the Mexican government was guilty of the crime of kidnapping him from his home in the United States.

PEARY HAS ISSUED NEW STATEMENT

Declares Rasmussen Could Not Have Learned Cook's Story from the Eskimos.

WASHINGTON, Oct. 23.—Commander Robert E. Peary, the Arctic explorer, has telegraphed to scientific friends here that it was impossible for Rasmussen, the Danish explorer, to have seen any of the members of the Dr. Cook party and that any information which Rasmussen received was therefore not from first hand.

That the story told in Rasmussen's report of his impressions of Dr. Cook's recently made public by Mr. Rasmussen at Copenhagen lacks authority, is the substance of Peary's latest message.

The dispatch came from Peary a day or two ago, and it has been scrupulously kept secret. Efforts to procure a copy of the dispatch today were unavailing.

BAN IS PUT ON A STOCK FRAUD

Los Angeles Company Runs Afoul of Postal Authorities by Crooked Deals.

WASHINGTON, Oct. 23.—A scheme for selling or buying stocks on the installment plan has been put under the ban by the postal department.

The scheme, known as the "Guarantee Securities Company of Los Angeles, Cal.," was alleged to have been operating in violation of the postal laws.

PRINCETON LOSES EXCITING CONTEST

PRINCETON, N. J., Oct. 23.—On one of these sudden plays characterized by the Princeton football team, a long substitute, right half back, on the Lafayette college team, caught the ball on a bound in the last minute of play after Cunningham's try for a drop kick had been blocked, and ran 80 yards for a touchdown, making possible a Lafayette victory over Princeton by the score of 6 to 0. Just as Captain McLean kicked the goal, time was called.

AVIATION PRIZES

BLACKHOLM, Oct. 23.—The aviation prizes were concluded here today. Henry Farman carried off the chief prizes of the week, including the grand prize of \$10,000 for the longest flight and a prize of \$2,000 for the fastest three laps around the course. Herbert Latham won the prize for general merit and the slowest circuit.

TILLMAN WILL NOT PAY TEN DOLLARS TO EAT WITH TAFT

COLUMBIA, S. C., Oct. 23.—Because he was asked to pay \$10 for a plate at a luncheon which will be given President Taft on the occasion of his visit to this city November 8, Senator Tillman has declined to attend and says that he may not serve on the reception committee.

Senator Tillman says that while Columbia is to be the nominal host of Taft, the city expects the state at large to pay for the President's entertainment.

COOK'S ATTORNEY OBTAINS AFFIDAVIT FROM GUIDE'S PARTNER IN MONTANA.

"THOUSANDS IN IT FOR ME," HE SAID

Had Repeatedly Told Bridgford That Dr. Cook Had Reached the Summit of Highest Peak in World.

MISSOULA, Mont., Oct. 23.—An affidavit contradicting the assertions of Edward N. Barrill in his affidavit declaring that Dr. Cook did not reach the summit of Mount McKinley was secured by the attorney representing Dr. C. G. Cook in this city today.

From C. G. Bridgford, until recently a partner with Barrill in the real estate business in Hamilton, Mont. Other affidavits denying statements made by Barrill and declaring that the latter had contradicted statements before he made his affidavit were also secured by the attorneys but have not yet been made public.

WAS BARRILL BRIBED TO LIE?

Had Repeatedly Told Bridgford That Dr. Cook Had Reached the Summit of Highest Peak in World.

MISSOULA, Mont., Oct. 23.—An affidavit contradicting the assertions of Edward N. Barrill in his affidavit declaring that Dr. Cook did not reach the summit of Mount McKinley was secured by the attorney representing Dr. C. G. Cook in this city today.

MURPHY'S CONSTABLE KILLS INSANE MAN WHO TERRIFIED CALAVERAS

STOCKTON, Oct. 23.—"Anstrian John," a crazy resident of Calaveras county, who on Thursday burned his own house, then set fire to Stephens Brothers' store at Shreve Ranch, which was destroyed with a loss of \$8,000, and set a nearby residence afire, was shot and killed Friday by Constable Schwoerer of Murphy's, who commanded the fugitive to halt.

TAFT HOARSE FROM HIS REST

Must Talk a Few Times Before His Voice Can Get Into Condition Again.

TEXAS THROWS VERY RESTLESS

Chief Executive Leaves Today for St. Louis to Begin His Long Trip Down the Mississippi River.

McLEAN'S ESTATE GOES TO BROTHER

Will Is Found Among Packet of Papers in His Coat—More Bank Books Found.

HASTINGS, Neb., Oct. 23.—The discovery of a packet of papers that had slipped unnoticed from the coat of the late Dr. Charles McLean or Schellert, will doubtless clear the mystery that has hung about his death.

DENIES SALE OF LINES TO TRUST

CLEVELAND, Oct. 23.—James S. Bradley, Jr. of Toledo, denied emphatically today that the Bell Telephone company interests had secured the independent company controlled by Bradley through his recent purchases.

PAINFULLY WOUNDED BY A BUGGY SHAF

SAN FRANCISCO, Oct. 23.—While Dr. Charles S. Taylor, a physician of Los Angeles, was on the front platform of a crowded street car today, a shaft of a buggy, which was being driven by the car, struck him on the thigh, inflicting a wound three inches deep. He was treated at the emergency hospital and departed for home tonight.

CANADIAN HOME TEAM IS DEFEATED

Five Thousand See All-California Aggregation Annex Victory from Visitors.

SAN FRANCISCO, Oct. 23.—The British Columbia soccer football team went down to defeat before the All-California team at the Stadium today in one of the most thrilling "round ball" games ever seen on a local field.

IRRIGATION DISTRICT AROUND OAKDALE

OAKDALE, Cal., Oct. 23.—Oakdale and the area around it in Stanislaus and San Joaquin counties were turned into an irrigation district today by a vote of 24 to 27.

LECTURE TOUR ABANDONED

Dr. Cook stated that his lecture tour will be abandoned for the purpose of completing an early as possible the data to be forwarded to the University of Copenhagen. These data and records will be officially passed upon by the Royal Geographical Society of Copenhagen. As yet these scientists have not examined the full and complete records of the doctor. These records he is now working upon.

KILLS JEALOUS HUSBAND

CHARLOTTE, Wyo., Oct. 23.—At the urgent request of both prosecution and defense, the Ten Sleep murder, in which seven prominent cattlemen are charged with the murder of three sheep men, Judge Farnham has ordered an investigation of the grand jury and jury list. It is charged that eighty-two names were fraudulently from the jury list and substituted from the jury box.

FLUME FROM HUME CONNECTS WITH OLD

Lumber Can Now Be Sent
to Sanger.

Blasingame Shipping \$9000
Worth of Cattle to
Los Angeles.

SANGER, Oct. 23.—The Hume-Bennett Lumber Company's twenty miles of new flume has been connected with the old flume a few miles west of Milwood. The flume now extends without a break from Hume to Sanger.

W. O. Blasingame drove \$9,000 worth of cattle into Sanger today. They will be shipped to Los Angeles.

The J. K. Army Company has ten girls constantly employed packing raisins. A. M. Thomas, the local manager, says that raisins are coming in quite freely.

The Stewart Fruit Company has been running since July 24. It keeps from twenty to twenty-five girls on its payroll and has sent out many tons of green fruit.

The company is still packing muscats and tokays, but will begin packing grapes next week. The company has averaged five cars a week for the season and prices have been fair.

The California Fruit Company starts its emperor pack next week. Hagg's Hooters play the Sanger rink on Sunday, October 24th.

Most of the merchants of Sanger have agreed to close at 6 p. m. It is thought that all will sign the agreement.

Miss Clara Blackman, a student in the San Francisco State Normal School, is at home on a vacation.

Many Sanger citizens took the Portola show in San Francisco this week. Among them are Louis Harlan,

BOY BIGAMIST DESERTS AGED WIFE

NEW YORK, Oct. 23.—Mrs. Janette Hisecock, 64 years old, formerly Miss Janette Sufferin, who married a stable boy of Ridge-wood, N. Y., in 1880, and who was seen in this city seeking refuge from her youthful spouse. She thinks that he has fled to the West with some of the money she gave him. She also believes that he has another wife somewhere in New York.

STATE BOARD WILL HOLD EXAMINATION

Candidates for Horticultural Commissioner Are to Be Given Tests.

Announcement has been made by the State Board of Horticulture that an examination will be held in Fresno on November 24th at 10 a. m. for the purpose of testing the qualifications of candidates for the office of county horticultural commissioner. The conditions of the examination are as follows:

1. All candidates must be resident citizens of the county.

2. All applicants for examination must register before the hour of beginning the examination and pay the fee of \$5 to the person designated in accordance with the law.

3. The list of questions for each examination will be submitted to each candidate in writing, and all answers must be written.

4. Every examination shall be held in the presence continually of at least one member of the board, or the person delegated by the board; no examination shall otherwise be approved by the board.

5. Every candidate must depend entirely upon his own information and the record received during examination shall disqualify the candidate.

6. Each of the subjects designated in this examination shall be considered and finished by the candidate before another is taken up.

7. Candidates for examination shall draw one and place upon it his signature and address. He shall then fold the sheet and place same in a plain white envelope which shall be furnished him by the examiner, and seal the same; no marks of any kind shall be placed upon the envelope.

8. The applicant shall use the number he draws for his papers, and no further marks or identification shall be used by him. The examiner shall collect the sealed envelopes from applicants and place them in a large envelope, seal same, and keep it intact until after all examination papers have been corrected and percentages determined.

9. The board will not recommend persons for appointment engaged in, or connected with the nursery business.

10. The board will require at least 80 per cent. of the questions answered in a satisfactory manner to entitle a candidate to a certificate.

11. As soon as possible the Board of Horticultural Examiners shall consult the resident fruit growers of the county in determining the responsibility and moral qualifications of candidates for appointment as commissioners.

12. The board of supervisors of the several counties, Lines 60 to 64, Sec. 2322, Political Code.

SUBJECTS FOR EXAMINATION.

1. Practical knowledge of insect pests and diseases in the county.

2. Best methods of controlling insect pests and diseases.

3. Orchard practice and general horticultural conditions in the county.

4. Technical knowledge of life history and habits of destructive and beneficial insects.

5. Quarantine work in county and state.

6. Administration of the office of County Horticultural Commissioner and knowledge of horticultural laws of the county and state.

CAST OUT, the disorders, diseases, and weaknesses peculiar to women—by the prompt action of Dr. Pierce's Favorite Prescription.

A woman's beauty depends on her health. Beauty in this case can be purchased.

A muddy skin, wrinkled face and sunken eyes, follow the disorders of the womanly functions, and when women are healthy, they are beautiful.

The "Favorite Prescription" is a powerful, invigorating tonic and a strong purgative. With it you'll find relief from sleeplessness, backache and bearing-down sensations. It's a positive remedy for those nervous conditions brought on by functional disorders—such as Nervous Prostration, Irritability, Fainting Spells, Dizziness, and St. Vitus's dance. In every case of "female complaint" it will benefit or cure. You should not accept a substitute for this non-alcoholic medicine.

Plants never freeze in a home heated by Cole's Hot Blast

You know where plants never freeze it doesn't get cold. Cole's Hot Blast maintains a continuous fire; it will hold fire from Saturday night to Monday morning; it will keep fire over night with a hot full of coal. With this stove you need only open a draft in the morning and the rooms are quickly heated with fuel put in the evening before. No other stove does this.

Cole's Hot Blast stove saves half the soft coal or slack or lignite, because it burns the gas as it arises from coal, and as gas is half the fuel in coal, Cole's Hot Blast makes soft coal, slack or lignite go twice as far as any ordinary stove.

In an ordinary stove the gas (half the heat value) arises from the coal as the coal burns and the gas goes right up the chimney. In Cole's Hot Blast the hot blast draft on top of the fire burns the coal from the top—burns the gas. Makes the coal last twice as long.

The unequalled fuel saving, the heat radiation, the even temperature, the holding of fire, are all the result of the patented features in the construction of this remarkable stove which cannot be used in making any other stove; and to the Patented Hot Blast draft which burns the gas as it arises from the fuel. Soft coal, as you know, is half gas. The make-up of the stove is interesting.

With this stove you need only open a draft in the morning and the rooms are quickly heated with fuel put in the evening before. No other stove does this.

Cole's Hot Blast stove saves half the soft coal or slack or lignite, because it burns the gas as it arises from coal, and as gas is half the fuel in coal, Cole's Hot Blast makes soft coal, slack or lignite go twice as far as any ordinary stove.

In an ordinary stove the gas (half the heat value) arises from the coal as the coal burns and the gas goes right up the chimney. In Cole's Hot Blast the hot blast draft on top of the fire burns the coal from the top—burns the gas. Makes the coal last twice as long.

The unequalled fuel saving, the heat radiation, the even temperature, the holding of fire, are all the result of the patented features in the construction of this remarkable stove which cannot be used in making any other stove; and to the Patented Hot Blast draft which burns the gas as it arises from the fuel. Soft coal, as you know, is half gas. The make-up of the stove is interesting.

Burns Soft Coal, Hard Coal, Wood or Cobs

Records Are Smashed On New Atlanta Course

**Barney Oldfield Breaks Own
Record, Driving Five
Miles in 3:52.**

ATLANTA, Ga., October 23.—Atlanta's automobile race track was formally opened to the public today and to celebrate the event Barney Oldfield, in his big Buick, broke his own record made at Indianapolis, by racing off five miles in 3:52.

George Robertson, driving his big Stimpson, drove five miles in 3:59 4-5, breaking the world's record hitherto held by Oldfield. He then made a mile in 45 seconds and two miles in 1:34.

Cluett, driving a Pope-Toledo, made two miles in 1:39.

Basie, in his Stimpson, drove two miles in 1:50. In his four mile dash he made the distance in 3:44.

Oldfield made the five miles in 3:52 2-5, beating his own record at Indianapolis by 19 seconds.

In the ten-mile event Robertson won. Time, 8:21 1-5.

EPISCOPAL BISHOP DIES
ATLANTIC CITY, N. J., Oct. 23.—The Right Rev. William Hobart Hare, bishop of the Episcopal diocese of South Dakota, died here tonight after a long illness, aged 75 years.

PLUMP FOLKS AND THIN FOLKS

**Samose Will Make People Fat—
"Money Back if It Fails," Say the
Patterson Block Pharmacy.**

The line of beauty in a woman may be thin and graceful, but not thin and beautiful. There is a vast number of pale, thin, scrawny people who are all brains and nerve, but without the strength and health that accompanies the standard weight. Good flesh and perfect health go together. A true flesh-forming food like Samose is absolutely necessary to many people.

No one can use this wonderful flesh-forming food for 10 days without a noticeable gain in flesh and strength. Carefully kept statistics show that out of every hundred people who begin the use of Samose, 88 per cent increase in weight and their health and strength are restored.

The Patterson Block Pharmacy have so much confidence in this remarkable flesh-forming food and health restorer that they are willing and glad to allow any customer to deposit 50c with them and take home a box of Samose with the understanding that if it does not give a marked increase in good flesh the money will be returned without any questions.

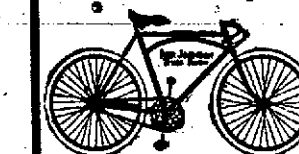

A Pleasant Jewelry Store to Trade With

SCHOOL OF MINES WINS FROM UTAH

DENVER, October 23.—The Colorado School of Mines eleven defeated Utah University this afternoon by a score of 14 to 8 in a game that was marked by frequent fumbling, in which Utah was the chief culprit, and by a sensational run of seventy yards for a touchdown by Captain Spring of the Golden eleven.

Besides the fumbling, Utah's tendency to offense play and holding in the line probably cost it at least one touchdown and possibly the game, as twice penalties were marked against it, the ball was within the very shadow of the miners' goal posts.

BAKERSFIELD FANS COMING TO VISALIA

VISALIA, Oct. 23.—An excursion will be run to this city by the Bakersfield team to give the fans of that city a chance to witness the double-header between the Pirates and Drifters, Traeger will pitch against Arthur Smith in the morning affair, and Hal- ough, the St. Louis twirler, against Maile in the afternoon. Ted Easterly, the Cleveland American catcher, will work for Bakersfield in both games. Tracey and Funk of the Fresno State League team, will play first and third, respectively, for the Pirates.

BARBARIAN CLUB LOSES TO NEVADA

RENO, Nev., Oct. 23.—A crowd of 5,000 people saw the University of Nevada beat the Barbarian Club of San Francisco, 15 to 5, today in the hardest fought game of the season on the local coast. Nevada's passing rushes offset the superior weight of the visitors. Both teams saved their goals many times by magnificent rallies.

Nevada's back, Harry Fletcher, suffered a broken hip.

MICHIGAN ELEVEN GIVEN BIG SCORE

MILWAUKEE, Oct. 23.—Michigan had the narrowest escape of its career today when the Wolverine eleven defeated Marquette 6 to 5 in one of the most brilliant games the Michigan eleven ever played.

With the exception of the first ten minutes of the game, the two eleven were on exactly even terms. In the second half the play was almost entirely on Michigan's half of the gridiron.

JENNINGS TO BE IN TIGER UNIFORM

DETROIT, Oct. 23.—Hugh Jennings signed a contract today to continue as manager of the Detroit Baseball club during the season of 1910. It is understood that the manager's demand for an increase in salary was compromised.

Pitcher George Mullin was pitched Schmidt was also pitched. Jennings signed season and Tyrus Cobb today signed for three years.

I'd Like to See the Liver of a Fat Man

This is the expression of a medical man who said that the liver of a fat man must present a wonderful sight when that man is alive and performing his regular duties. The liver is the largest organ in the human body. The stomach calls on the liver and so does the blood. If the liver gives to the digestive apparatus improper juices then the digestion is wrong. This is what makes people fat. The liver is not right. On popular opinion we have made the famous Marmola Preparation into Tablets which are eaten after meals just like food and they digest that food as it should be digested. They remove fat already accumulated at the rate of from 12 to 15 ounces per day and leave you wrinkles or flabby skin. Carry one in your vest pocket or purse, when you dine out and eat what you will. Fasting, diet and exercise will not reduce fat. You only starve the body and by tearing down other organs you are laying the foundation for the destruction of the Marmola tablets are sold by all druggists and in greater quantity than all the other so-called fat reducers combined. There must be merit in them or their sale could not be growing larger every month. Ask any druggist or if you prefer send 75c to the Marmola Company, Dept. 465, Detroit, Mich., and they will send you a large case of Marmola Tablets in plain package by mail.

Better Optical Service

Harriman's Successor

A new figure has come into the domain of American activities, to dominate in the great transportation field, the master of many thousands of men and whose word carries with it an authority more far-reaching than that of the czar. As the head of the colossal combination of railroads, known as the Harriman system, Judge Robert S. Lovett challenges world interest. He is the apotheosis of American opportunity.

A farmer's son, born in Texas, he has, at the age of 49 years, stepped into the very forefront of the world's affairs.

He is among those, the pride of American history, who have risen by step-made their way to position and power. A graduate from the plains of Texas he is the central factor in the nation's activities. His rise has not been phenomenal.

GREW INTO CONDITIONS.
This title of the world's affairs grew into the conditions by which he was surrounded and matured them. His rise finds its counterpart in the story of Lincoln, of Garfield, Grant, only with this difference, the political career offers easier advancement than the way along the lines paved by capital. Eloquence and personality are the factors in politics. They do not figure where capital dominates.

The financial activities permit of no errors, mistakes of judgment or of feelings of humanity. If he is a school teacher, he is a school teacher, yet the successor to Harriman in his face shows that his character as passed through the ordeal with his sympathies as deep as they were in boyhood when he toiled on his father's farm. His head is molded to the judicial form and firmness and executive ability are portrayed by his massive forehead and clear-cut features. His brown eyes are clear and penetrating and display interest in everything that comes within the focus of their gaze.

PHYSICALLY LARGE.
He is physically a large man, standing fully six feet, with broad shoulders and of athletic frame. It appears to be the personification of health and activity and though at the turn of fifty his hair is untouched by the frosting of time.

He is reserved in manner, though he possesses a personality that courts approach, and he displays keen interest in conversation and at times the lines at his mouth and a twinkle in his eye give evidence that he is inclined to appreciate the humorous side of life. He is deliberate in his answers. It is "yes," or "no" as soon as he has given the case momentary consideration. Judge Lovett is not affected by success. His habits are simple and in dress he is modest. His voice is deep and though every word is uttered with decision and bears the tone of authority.

The new railroad factor shuns personal publicity. He is not unlike his predecessor, E. H. Harriman, in his earlier years. The railroad magnate then dreamed the newspaper interviewer, but he afterward made them his confidants and had among them many of his most ardent admirers and in some cases advisers. Judge Lovett realizes his responsibilities. He has the determination, coupled with the desire, to do what is right by the great interests he controls and the public whom he serves.

PEOPLE WILL JUDGE.
His first interview after his promotion to the power of Harriman he declined to talk on the problems that confronted him, but remarked:

"When you learn why Ballinger was picked for the Interior portfolio, you will get a glimpse of the tremendous power of the great Guggenheim mining interests, from whose headquarters the broad, blazed trail leads directly to No. 26 Broadway, New York, the home of Standard Oil."

This is the bold and frank declaration made by John L. Matthews, who contributed a startling article on the subject in the current number of Hampton's Magazine. Mr. Matthews, one of the country's leading experts on the tremendous water-power question, has now, when he turns to a consideration of what irrigation is doing for the West, he comes face to face with that Pinchot-Ballinger controversy concerning which he seems to be possessed of a keen sense of the inside information which is of a character little short of appalling. He says:

Roosevelt, aided by Pinchot and Newell, Garfield, and the other members of the forces lined up against the progress of the grabbers. Bullen and sore, they were quietly waiting until the Rough Rider and his decisive methods were safely out of the way.

The great interests involved in grabbing water-powers and other valuable national resources include not only the J. P. Morgan-General Electric Group but among others the Standard Oil and the Guggenheim Mining and smelting forces.

When Roosevelt left office the water-powers sites most coveted by the Guggenheims-Standard Oil crowd were held up, withdrawn by the order of President Roosevelt. The Des Chutes valley was safely, though temporarily, preserved from the predatory grab of Hill and Harriman, and all over the West was a new sense of respect for law and for the Public Domain, of respect for Government property as common property, which Roosevelt and Pinchot had.

About two weeks after Richard A. Ballinger became Secretary of the Interior, he gave away the Des Chutes valley. Without recompense, without reservation except as to a single dam site to be freed in the distant future, he handed this million horse-power, this rich inlet to Central Oregon, over to the game of grab for the big which the railroad had always played he took up where Roosevelt had interrupted it. Oregon was not consulted. The value of her power was not considered, though by her law no one may move a single power without license from the State. Harriman and Hill wanted the valley—and into their hands it went.

Aeroplane vs. Dirigible

Speaking with all the authority which belongs to him as the winner of the Bennett Aeroplane Cup, against International competition at Rheims, Glenn Curtiss, in the course of a fascinating article in the current number of Hampton's Magazine, weighs the relative uses of the aeroplane and the dirigible balloon. He says:

"When confidence in the safety of flying machines becomes generally established, people will want a light, stable, aeroplane, which will carry one person and which will take up little space. Such a machine could be built at this time, but there is no demand for it as there is no purpose for which it could be used. When there are hotels, acre stations, clubs, theatres and other places of public interest, and where landing stages and suitable means for taking care of the aerial automobiles, such a machine will find its use."

"It is different, however, with a machine which you might regard as a sky-touring car. The numerous prizes that have been offered for long flights and for high flights have offered an incentive for building strong heavy aeroplanes that can climb up on the

Wealth In the Ozarks

If the trip which Gov. Norbert S. Hadley plans soon to make down the Current River into the heart of the Ozarks results, as hoped, in calling the deserved attention of capitalists and home-seekers to an exceedingly rich, though at present overlooked, section of the state, it should be recorded as one of the most notable business events of the governor's administration. It is true that the Ozarks already enjoy a wide reputation as the home of the renowned Missouri apple and that Southwestern Missouri is rich in the value of the fruit and farm lands in the valleys of the Ozarks, ordinarily the encouragement of their settlement

great resources of the Ozark region have scarcely been touched. That this condition should have so long existed is, indeed, somewhat remarkable. St. Louis capitalists are usually alert in seeking profitable investments, yet it is recognized that the Ozarks within 200 miles of St. Louis, if fully developed, would produce a wealth so great that its effects upon the business interests of the city could scarcely be overestimated.

While the trip of Governor Hadley is away from the state to exploit the value of the fruit and farm lands in the valleys of the Ozarks, ordinarily the encouragement of their settlement

THE AVERAGE MAN.

Oh, the Average Man's a ubiquitous
creature.
He is popular, too; with the mob; he doesn't make any particular fuss. But can always be found on the job. His knowledge is wide and convincing.

That is merely a part of his plan. And to walk round the country with the seven-league stride. Is the goal of the Average Man.

Suppose there's a difficult question of state.
Where giants oratorical be; In the lengthy debate his opinions have weight.
That would simply amaze you and me.
When the speaker concludes in a glorious blaze.

Then imagine, if only you can, The worth of that quite indispensable phrase:
"As it looks to the Average Man."

The publicist, too, drags him in by the heels.
Whenever he's in a tight place; He says "I'd the glamor that over him steals."
"I'm not stating my side of the case; A broader and more comprehensive view.

As the nation's horizon I scan In logical, so I present to you. As it looks to the Average Man." Who is he? What is he, where is he? In vain.

We search through the land up and down; Somewhere he's enjoying, afar from the strain. His perfectly well earned renown. And so, in the heated political fight. We hear from Deerehahn to Dan. That phrase so compelling it never grows trite:
"As it looks to the Average Man."

—from the New York Sun.

"Madam, could you spare a hand or cold bite? I wix will do me much discovered de poiz."
"There's yer profits!"
"The proper thing, mum, is to provide de banquet and den ask fer de profits."

Great Government Saving

The general supply committee which was created by executive order of President Taft in May of this year, has already saved the government a tremendous lot of money, as I happen to know by personal experience," said Mr. Hugh H. McDonough, a prominent New York importer, at the Hotel Kennerly.

"I know personally of almost \$200,000 that Uncle Sam has saved over last year's prices for government supplies, and it would have been bigger but for the advance in cost of some articles. Crude rubber, for instance, went up 55 per cent between April 1, 1908, and the same date 1909. The unsettled condition of the tariff also operated adversely, as the new schedules had not been fixed at the time contracts were made. One has, saving was made on wine, largely used by the Postoffice Department; also in glass inkstands, through the buying of large quantities.

"The board of wards, which passes on the contracts of the general supply committee, is composed of three ex-

cellent business men—Assistant Secretary Hilts, of the Treasury; Mr. Assistant Secretary of the Interior Jesse E. Wilson, of Indiana; and Mr. P. C. DeGraw, Assistant Postmaster General. They are to be depended on to safeguard the nation's interests at every stage of the game.

"Dr. T. C. S. Marshall is vice chairman of the committee, and has worked for the success of the plan with high intelligence and enthusiasm. It has passed beyond the experimental stage, and is a permanent part of governmental operation at the Capital. Instead of each department buying its own supplies, all the departments have a representative in the committee, which advises for bids, lets contracts, tests articles submitted, and finally makes the awards. This eminently fair and businesslike way of buying public supplies through competitive bidding ought to have been in force for years, and had it been, Uncle Sam would have been better off by a good many millions."—Baltimore American.

LOCATING A "SPECTER."

"Ghost" That Frightened Neighbors Reputed by House Owner.

"There is that face in the window again," declared a frightened woman as she pointed out a ghastly looking figure in the window of the house across the street in a congested district of Chicago. A little group of women and children had gathered on the corner to discuss the mystery of the neighborhood. For the past two weeks every one in the block had been terrorized by the appearance of a face in the window of the second floor of an old tumble-down house, long vacated on account of a story current in the neighborhood declaring it to be haunted. No one could be paid to go inside the place, and children hated to pass it even in the day time.

But now, since this new development, the fear of the excitable populace was at its zenith. All felt sure that the ghost of a man said to have been murdered there had come back to haunt his old home. When the news of the ghost came to the owner, he decided to investigate and learn the real trouble. He boldly entered the old place, despite the repeated and urgent pleadings of the women, who declared that he would never be seen again. The ghost got into the room, he went and mounted the creaky stairs to the second floor, expecting every moment to encounter the specter. He entered the front room, where the specter had been seen, and after about two minutes came out, smiling serenely. Reaching the street, he went at once to the house directly across the way and called on the people in the second flat. Then he came out and explained to the frightened neighbors.

His investigation of the house had disclosed no ghost at all, but merely a ray of light seeming to come from a building across the street. At that place he found nothing more ghastly than a moving picture exhibitor, who had been amusing himself night after night by casting on the curtain of the "haunted" house a pale yellow reflection resembling the figure of a man. He knew the excitable nature of his neighbors, was familiar with the store of the haunted house, and decided to have a little fun out of it.

The next night the "ghost" did not appear. That week the owner sold the place and it is now undergoing repairs to make it habitable for the new owner.—From the Chicago News.

MAYFLOWER RELICS.

Among the Maine people who claim to have genuine Mayflower relics is Mrs. Hiram Butterfield, of Farmington, who has a piece of the bed cord used on the Mayflower. It is made of whale's sinew. One of Mr. Butterfield's ancestors came over in that historic vessel. Mrs. Butterfield also cherishes with great care a large conch shell which belonged to her grandfather, Elisha Lambert, and which was used at Martha's Vineyard during the revolutionary war as a signal of danger from the approach of Britishers.—Lewiston Journal.

HOSTETTER'S
CELEBRATED
STOMACH
BITTERS

With a bottle of the Bitters, you need not fear an attack of Heartburn, Sick Headache, Indigestion, Dyspepsia, Constipation, Colic & Grippe because it will keep the digestive organs strong and healthy.

Treatment of Women Convicts

The woman who goes wrong is a greater menace to society than the man who errs. This is a truth generally conceded by penologists, but few persons outside of that class realize the fact that 53 per cent of the convicts in American prisons today are women, and fewer still are aware of the new means which are being adopted for the care of these charges upon the state.

In one of his remarkable articles upon the prison system of the United States, now appearing in Hampton's Magazine, Charles Edward Russell, the veteran reformer, thus treats of the subject:

"When a woman becomes a criminal she is usually much more reckless, determined, and desperate than the average man. A bad woman is worse than a bad man," say the authorities, and fortify their opinion with reasons. Thus Mrs. Ophelia L. Amigh, the matron of the excellently conducted Women's Industrial Prison, at Geneva, Illinois, says that the hysterical element is a desperate in her offenses when at large and more difficult to manage when she is in custody.

Mrs. Amigh, from her years of study and observation, has come to divide women convicts into three classes: dependents, defectives, and delinquents. Dependents have been without homes, reared haphazard or at the hand of charity and without the restraining influence of their parents.

Defectives are born into the world below the normal in mind and body. The number of these among the women convicts is much greater than one would suppose. Mrs. Amigh's observation has convinced her that the child of a drunkard father or drunkard mother is almost always defective mentally, morally, physically, or in all three ways.

One of these Geneva inmates, a bright, intelligent, good-looking young woman, an accomplished musician, docile and obedient otherwise, is one who is an incorrigible thief. She steals for more than a few hours the trinkets and trifles that she steals. And yet she cannot be cured of stealing; it is an inherent trait in her mental or moral fiber. Nothing seems to remove it.

Mrs. Amigh's third classification, delinquents, comprises those that go astray because of temptation, necessity, conditions, or ignorance.

Thus of the 500 women at Geneva, only 10 per cent have parents that are living together; 40 per cent come from broken-up homes, or from no homes, their parents having been divorced, or separated, or else were never married.

Surely there is a stupendous fact to contemplate; we seem now to be coming to primal causes. More than 100 prisons and reformatories in the United States are exclusively for women. Take 10,000 women annually committed to our penal institutions and suppose that, as at Geneva, 90 per cent of these come from destroyed homes. Is there not something here to give us serious thought? The value of home influence is a phrase that flies unnoticed from lip to lip. Here is mathematical and indubitable measure of that value, here is the index of what the unviolated home means to society.

Among the women convicts at Geneva are several burglars and house thieves. One of the burglars is a former housemaid. She had lost her place and some money was owing to her. She broke into the house one night and took enough valuables to cover her claim. The cause of two others were the same. Typical of convicts, she had become infatuated with two vicious young men that had taught them to steal, then the plunder and deserted them when trouble came.

With most of her charges, Mrs. Amigh has found moral regeneration quite possible. She has a system of arousing their interest in music and in things beautiful and good that really seems to train the evil out of them. Of her graduates many have won success and honor in the outer world. One is the best paid stenographer in Chicago. She had been convicted of larceny. Until she went to Geneva she had never known one good influence.

At Geneva the girls receive a general education, are taught dressmaking and housework, and are specially trained in music or art. If they show aptitude for either. Above all, they are placed under the beneficent parole system, one of the brightest phases of the new day that is beginning to come in our prisons.

The Star-look occasion, a few days ago, to discuss the extravagantly critical assertions of one Rev. D. H. Carrick, of Lawrence, Kansas, who left the ministry and took a job as street car conductor because, as he alleged, no man could be honest in the ministry. His garrulous comment embraced the contention that the pew in so critical of the minister and so dictatorial his sermon that he cannot preach fearlessly without being rebuked by his parishioners or possibly lose his position.

The Star expressed doubt as to the responsibility of a man of the cloth who would make such extreme allegations. Now comes the report from Lawrence that Carrick has reconsidered, after holding his job as street car conductor a few days, and will go back to preaching. All of which stamps his utterances as reckless and of little consequence. The only reason the Star gave prominence to his words was because this term of criticism of the churches and of the ministry is common—a great deal more common than the facts warrant.—Pasadena Star.

LEXINGTON, Ky., Oct. 23.—Salvator, considered by many to have been the fastest running race horse the world has ever known, died today at the Elmendorf farm of James B. Haggin.

You never have to pay an exorbitant price for Sincerity Clothes. They're full of style and good taste and snap—all of which is judgment which isn't figured in the making cost. When you buy

Sincerity Clothes

you pay for nothing but best materials and best tailoring. A young man finds models meant only for him and cut not only with fit in view, but fitness, too. An older man has just as many garments designed for his years and build and ideas. This label

is in every coat. By knowing the concern back of your clothes, you can make sure of the wear ahead of them. The best store in town is the best place to look for the Sincerity mark. Wherever you find it, you find a square deal. A book about fashions for young men (and other men) free. Ask

Kuh, Nathan & Fischer Co.

MAKERS CHICAGO

Gentlemen, Here Are Clothing Facts That Admit of No Dispute!

WE have established beyond a reasonable doubt that OUR HAND TAILORED CLOTHES AT \$15.00 are the superior of any offered to the clothing buying public of today.

To prove this to you we are willing to have you take these suits home, compare them, place the materials, workmanship and

general appearance along side of any suit shown elsewhere and we will await your verdict. We feel reasonably sure of our position because we know we are taking less profit than any clothing concern in the state.

Than the

\$335 Kurtzmann

The Kurtzmann Piano has been before the public

Since 1848

At the very outset its makers determined to make a piano whose durability of tone should be its characteristic feature—and no effort toward the consummation of this result was neglected.

The fame of the Kurtzmann is founded on the fact that in every particular it has held its own with instruments much higher in price.

In beauty of case, tonal quality, durability and mastery of workmanship, the Kurtzmann has no superior, and every owner of one of these superb instruments is enthusiastic in its praise. Anyone in search of a splendid piano at an exceptionally low price should come in and see the Kurtzmann. We make a fair allowance for used instruments, and arrange easy terms of payment if desired.

S.S.S. NATURE'S CURE FOR RHEUMATISM

In a disease so painful as Rheumatism, medicines containing opiates and nerve-quieting drugs are often used. Such treatment is dangerous not only because it frequently causes the sufferer to become addicted to the drug habit, but medicines of this nature are always injurious to the system. Rheumatism is a disease of the blood, and its cure depends entirely upon a thorough purification of the circulation. As long as the blood remains saturated with uric acid, an inflammatory condition of the nerves, muscles and tendons of the body will exist, and the pains, aches, soreness, and feverish flesh of Rheumatism will continue. The one safe and sure cure for Rheumatism is S.S.S. It is nature's remedy for this disease, made entirely of the healing, cleansing juices and extracts of roots, herbs and barks from the natural forests. S.S.S. does not contain anything that is in the slightest way injurious to the system. It is absolutely and purely vegetable, and free from opiates or sedatives of any kind. S.S.S. cures Rheumatism by removing the uric acid from the circulation, it makes the blood pure, rich and healthy so that instead of depositing sharp, uratic impurities into the muscles, nerves, joints and bones, it nourishes every portion of the body with natural, healthful properties. Book on Rheumatism and any medical advice free to all who write and request it.

Arlene Boling with "Honeymoon Trail," at the Barton next Wednesday and Thursday evenings.

The much heralded comedy fantasy, "In Dreamland," Emmett Devoy's latest and best effort, will be the attraction at the Barton next Tuesday evening. The story in brief is that of Bob Hammond, a complacent, well-to-do young man of the present day. The first act takes place in the living room of the Hammond's fashionable up-town boarding house. It is Mrs. Hammond's birthday and the young wife is very much piqued because her husband has forgotten that fact. To her annoyance she finds that her husband is leaning towards spiritualism. His own creature comforts and content with visitors from the other world absorb him to the exclusion of everything else. He returns home filled with enthusiasm over a conjure of shades that is to take place that night. In consequence he declines to take part in some minor social affairs planned by his wife and is left to his own devices. Hammond falls asleep on a lounge and a spiritualistic seance begins in earnest. A daughter of Venus, the goddess of love, appears, a magic world that deals out thunder and lightning with Jove-like power and the self-satisfied young man of the world is put through mental torture while "In Dreamland" is being about a thorough re-education. The act is the greatest of its kind ever seen on any stage. The audience is kept in a continual whirl of pleasurable excitement and the fun is fast and furious throughout. It seems impossible to describe the dream-impossible effects. Some idea may be gained from the fact that the electrical effects are produced by inventions that have been patented by the Emmett Devoy Company. They are worked by three expert electricians carried by the company. The electrical engineers have been rehearsed as carefully and thoroughly as the members of the cast. The magical illusions are also a big feature. The spectators are thoroughly mystified by the weird changes that are going on before their eyes. The magicians carried by the company say that anyone can see how the tricks are done if they will watch from Sunday and is thoroughly built in the tricks of the Indian Fakirs. The other two are graduates from Kellar and Thurston ranks.

Hammond breathes a sigh of relief when he awakes and finds he has been dreaming. The nightmare with its vivid and realistic pictures has had its effect and he realizes that the lesson has been a wholesome one. His office slave love, for his wife, whom he has neglected for clubs and dances, has now interest in life and a disposition to treat his mother-in-law as if she were human are a few of the things accomplished by his visit to the realm of dreamland. The fallacies of spiritualism are amusingly exposed and not only Bob Hammond but every one who sees "In Dreamland" is thoroughly convinced that fknir is a synonym for humbug. The play is full of scintillating humor and keen but good natured satire. It fairly bristles with dramatic situations and has been staged without regard to cost. Neither pains nor expense have been spared in the selection of a cast. Among those who will support Mr. Devoy are Bertha Shone, Josephine Robinson, Eva Randolph, Natalie Jerome, Emily Anderson, William Hurst, L. B. Carlton, John E. Maguire, William Robinson, Arthur Lurie, John Milton and Charles Hudson.

HONEYMOON TRAIL.
The much talked-of event among theatergoers at the present is the announcement that Mort H. Singer will bring the big Chicago musical comedy, "Honeymoon Trail," to the Barton next Wednesday and Thursday evenings. This will be practically the first of the new big musical comedies to visit here, and it is sure to be greeted by houses worthy of the play. The book, music and lyrics are by the authors of successful musical comedies, Adams, Hough and Howard, who have with "Honeymoon Trail" given a series of wonderfully popular plays to the public in "The Prince of Thought," "The Golden Girl" and "Blithedale Cinderella." The story of the play is both an interesting and amusing one. It deals with the romance of a millionaire called "Sneaky Hollow Reed Cure" and a hotel known as "Liberty Hall," the guests of which are mainly interested couples seeking divorce. Ex-husbands and wives fraternize genially on one side

of the "stage town," while the nervous wrecks of the matrimonial add to the fun on the other side. To this happy colony comes the bustling salesman of a brand of baked beans and it is not long after his arrival that the fun begins and is furious. With his breeziness and wit he soon turns everything upside down at both the hotel and matrimonial, makes enemies of friends and restores nervous wrecks to their normal condition. The first act ends with his trying to elope with the daughter of a rival manufacturer of beans, which is interrupted by the hurly-burly of the hotel by a bouncer who is there trying to sell false mining stock.

The second act opens with a garden party on the lawn of the hotel, the guests of both places mixing with one another and causing many very funny situations. It ends as all theatergoers want plays to do, happily, with the marriage of the salesman and his sweetheart.

The locale of the play, Lower California, furnishes great scope for both the scenic artist and the costumer, and the Princess Amusement Company has more than taken advantage of this by furnishing some very beautiful scenery and wonderful costumes.

Some of the big song hits that are introduced throughout the play are "When I Feel Like Loving," "You Can't Be a Friend to Everybody," "One Little Boy Had Money," "Nothing to Do But Nothing," "Honey-moon Trail," "Fun Going to Steal the Moon," "Don't Want a Million Dollars," "Whose Little Girl Are You?" and "The Golden West." It is safe to make the statement that long after "Honeymoon Trail" has left the city, "When I Feel Like Loving" and "Whose Little Girl Are You" will be whistled and sung by everybody who had the fortune to hear them.

Bert Baker, whom all the Chicago papers lauded to the skies for his clever interpretation of an Irishman in "The Power of the Panch," has made a big hit in the same. The seat sale opens tomorrow morning.

THE TRAVELING SALESMAN.
Following the policy established by Henry B. Harris with his "The Lion and the Me" and other comedies, the presentation in this city of "The Traveling Salesman," the latest comedy success of James Forbes, author of "The Chorus Lady," will be of the same high character as was in evidence when Mr. Harris' other plays were presented here.

"The Traveling Salesman" will make its bow to the theatrical country in the city on next Sunday evening, and will no doubt be received with the same hearty acclaim as was manifested during the six months' run of this delightful comedy at the Gaiety Theatre, New York.

The cast includes none but well-known people of established reputation and both the manager and the author have left nothing undone to make the performance in this city one well remembered. The seat sale opens next Thursday morning.

SOUSA'S BAND.
After a strenuous six months John Philip Sousa, composer-conductor, has begun his 33rd semi-annual tour as

director of the globe-trotting band that bears his name. Sousa has won international distinction and deserved fame as the representative bandmaster of his march compositions are today in vogue in every civilized country in the world. His personality and shrewd tact has brought him music to an elevated plane unequalled and is the object from which present day imitators gain their point. Sousa will not give the concert season his customary extension as "The March King" will be obliged to devote his attention to the production of his new opera, "The Glass Harmonica," which production will be made about the first of the new year. For this reason the band concert will comprise a quick trip to the Pacific coast and return, closing in New York just before Xmas time. The concert at the Barton is Sunday evening, November 2, and the announcement should be met with an unusual amount of interest.

"THE THIRD DEGREE."
Henry B. Harris will bring to the city for presentation at the Barton on Wednesday evening, November 3, Charles Klein's latest play, "The Third Degree," fresh from an enormous success in New York. Mr. Klein will be remembered as the author of "The Lion and

SPECIAL 10% OFF CUT GLASS HOLLANDS'

Commencing Monday, Oct. 25

We have the largest, prettiest and most complete line of cut glass ever exhibited in our city and the prices are simply remarkable.

As to Assortment We Have:

Nut Bowls	Fruit Bowls	Vinegar Bottles	Frosted Bun Buns

Don't fail to drop in this week and make your selection.

Take a look at our show windows, which are teeming over with the new, attractive, genuine cut glass at values that will positively suit.

TRY TRADING AT HOLLANDS'--IT PAYS

the Mouse," the greatest dramatic success of the country.

In "The Third Degree," instead of dealing with politics and finance, Mr. Klein has seen fit to deal with certain conditions that exist at the present time in New York city. The story is one of intense interest, and has much to do with the unswerving devotion of a woman to her husband, although the entire world has forsaken him. With out funds and without friends, this woman makes a fight for her husband's life against the powerful influence of the police and public opinion.

It is a drama replete with human interest and so vivid are the situations that the interest of the audience is held from the rise of the curtain on the first act, until the final word is spoken.

Mr. Harris has engaged a company that includes none but prominent players.

UNITARIAN PULPIT.

A Worm, or a Son of God?
Is man "a worm of the dust," a fallen, lost being, incapable of doing or being good? or is he a Son of God, divine in his nature, and capable of living as a man and a son of God, brought to life? In the answer to these questions lies the core of the radical difference between the old and the new faith, as I will show in my lecture tonight at the Porter Lecture Club hall, 1350 K street. Whenever I see a man groveling before God and calling himself a "poor worm of the dust," I am inclined to accept his statement. Yet I know that he dishonors both God and himself by the assertion. No man is a worm, save in the meanness of his own thought. He is divine, and if he chooses to lie in the dust it is because of his own contemptible choice. I always feel like saying to such a crawler, "Get up! Assert your birthright! Stand up! and be the man God wants you to be, a strong self-reliant son of God! Leave crawling to invertebrates. You have a backbone. Use it!"

J. A. CRUZAN, Field Agent.

A FORTY-ACRE SNAP.
\$5,500, half cash if sold before November 1. Well improved 40 acres, 27 in peaches, 5 alfalfa, balance graded for planting; 2 acres peaches bearing, balance 2 and 3 years old. 7 room house, furniture, buggy, cow, incubator, brooder, chickens, large barn, several tons of hay, wind mill, tank, trays, boxes, and tools and implements sufficient for working place. You can't beat the value.

1250 Kern St., Fresno.

FUNERAL NOTICE.

The funeral of Mrs. J. H. Hunt, 604 O street, who died Friday morning, will take place at 2 o'clock Sunday afternoon from the First Christian church, Fresno Lodge No. 91 T. F. B. will take charge of the services at the cemetery. All members and officers of Fresno lodge will meet at Elks club hall at 1 o'clock and march to First Christian church at 1:30.

CARD OF THANKS.

We wish to thank our friends for their kindness and sympathy during our late bereavement in the loss of our little son; also for the beautiful floral offerings.

Indian Visits White House

Resplendent in a red blanket, clad in the costume of his fathers, head and all, Rev. T. C. Thomas, a full-blooded Chippewa Indian of Odanish, Wis., renounced Hiawatha as the ideal of the Indian and then predicted that when the great race war between the whites and the blacks came to an end—and he seemed confident the war was coming—an Indian would become ruler of this country. Speaking of Hiawatha he said:

"It is very simple. When a white man asks an American 'Who is your greatest man?' he says 'George Washington.' The little Indian had sitting in the forest with his bow and arrow, observing the trees and the sky and the sand and the waters of the great lakes and the animals and fishes, asks himself, 'Who made all these?' He cannot answer, so he asks the old man of the tribe.

"'Minnebooshoo,' says the old man. 'Minnebooshoo made the earth and the sky, the sun and the stars, the wild things and the fishes, and he made you, too, oh, my son.'

"The Indian before he became a Christian, naturally supposed that Minnebooshoo was the greatest man of his nation, and when the first white man asked him that question he replied 'Minnebooshoo.'

"'Where does he live?' asked the white man.

"'Kliche-wah-sah,' said the Indian, meaning 'far off.'

"The white man's ears were not tuned to the Indian pronunciation, and they caught it 'Hiawatha,' and one of the white men, Longfellow, wrote our legends with this unknown 'Hiawatha' as his hero.

"We do not know any Hiawatha, do we?" asked the speaker, appealing to

the aged men who had places of honor on the platform. There was a slow shaking of heads. 'Minnebooshoo,' said the speaker, and over each seemed and seemed contentment there came the light of understanding and a grunt of assent.

After outlining the similarity of the primitive Indian religion with that of the Jewish church, stating that the Indians had a legend of the destruction of the earth by a flood and used the cross as a symbol, the speaker stated:

"When I went away to school, I was born a little red papoose in a hut in a wilderness and kept warm by means of bark, went down to the white man's school and saw his numbers, wrote his inventions and how he made even the earth obey him. I thought 'I would be well, Nabunashah, if you and your people were wiped out, annihilated, for of what avail would it be to you to survive when the white man has all this?' But God put good thoughts into the white man and made him look after the Indian and lift him up, so the white man gave us schools.

"There is hope for the Indian. One of these days I am going to Washington and help you make your laws. You have given me the right of the ballot and you will give me a seat among your counsels.

"Listen, and the all figure became still taller, 'one of these days the white men and the negro, whom you landed on these shores, will fight. It will be a bitter fight. The white man is strong and has a good brain, but there are many of the black man. Each sun that dies sees before he rests seven hundred little black babies born into this world.'—(Traverse City, Michigan, Cor. N. Y. Herald.

Indians Claim Lands

A tribe of Montauk Indians, with the chieftain, Wyandock Pharaoh, at their head, swooped down on Silverhead, L. I. Tuesday, demanding that the whites return to them several thousand acres of happy hunting grounds which, they declare, rightfully belong to them.

They did not come with piercing war whoops or paint-beanched faces, but were armed with documents, some of which were executed under the order of Charles II of England, and bore the date of 1660. The fray came before Judge Blackman, in the supreme court, second district.

For years the scattering forces of the once powerful Montauk tribe, the peer of all the coast tribes, have been saving their old charters, raising a fund with which to conduct a legal fight for the return of the land now occupied by wealthy persons for country residences. The Long Island Railroad also occupies part of the land in question.

It required a special act of the legislature before the Indians were permitted to file a civil suit, for, being wards of the nation, they were not allowed to begin civil proceedings. Unless the railroad can prove tribal connections dating back to the first legal instrument intact, their contention will be in vain. It is held by the defendants that the Indians have intermarried with negroes until the Indian blood is almost extinct. Several of the men in the case have Indian facial characteristics, but the "squaws" would pass for negroes.

Chief Pharaoh says his fathers owned all Montauk Point until defrauded

of it by the crafty whites. He admits they relinquished their rights from time to time for certain sums, but holds that under the law an Indian cutting signs away any part of his landed rights.

About the year 1815 the redskins agreed to let the whites occupy the land provided they gave to the Indians the privilege of pasturing their horses and raising two thousand pigs each year. And the chief said that that was all they wanted now. Is it any wonder that Miss Ada Rehan, the actress, who has a beautiful home on Montauk, is alarmed lest a pig sty be built on her front terrace?—New York Herald.

The Los Angeles agitation for State division has proved to be a first-class fizzle and has practically petered out already. A called meeting of the presidents of the civic and commercial organizations of the counties supposed to be interested in the movement held in the Los Angeles Chamber of Commerce rooms on Tuesday night was only shambles attended. Several of the more important civic and commercial organizations in Los Angeles declined to send representatives, showing that the community in which the movement for State division was started is divided on the proposition. There was a notable absence of enthusiasm displayed by the forty-one delegates assembled to arrange a campaign program and definite action was finally postponed until December 1. That means giving the movement time to die a natural death.—Oakland Tribune.

LINES TO A MARTIAN.
People credit you with knowledge of a most amazing kind.
Of your engineering skill they speak with awe;
I suppose a week would do you—and you wouldn't be behind—
Just to dig a little ditch at Panama.
I believe you're full of wisdom, but I'd like to quiz you once.
Will you kindly answer this one, if you can?
We can outpeer our ditches—but I need a pair of trousers—
Can you show me how to get 'em, Martian man?

I suppose in aeroplanes you have traveled far along
On the bright and shining pathway to success;
You have little need to worry if the Wright machine is wrong.
For you've passed the painful time of storm and stress,
I suppose you fly and flutter gaily morning, noon and night.
Like a healthy turkey buzzard or a bat;
But I do not care for flying—'tis for walking shoes I'm trying.
Do you think you can assist me as to that?

There's some trouble to be taken and a deal of money spent
In science to find out how wise you are.
And I'd like these queries answered:
Could you pay my monthly rent?
Can you show me how to own a motor car?
Can you tell me how to satisfy the grocer without cash,
Or pay the lighting people for their juice?
These are things that make me dance, sir.
Now, please, tell me what's the answer, if you cannot—then I wonder what's the use?
—From the Chicago News.

ST. IVES.
St. Ives hangs over the sea,
Bathed in splendor up to the knee,
Thousands of gulls there follow their lives,
For out of all measure they love St. Ives.

Is it her delicate sky avails?
Or brotherly trawlers with copper sails?
Or cliffside pleasures out of reach?
Or trails of the pilchards on every beach?

Hardly such could allure or bring—
This storm of gulls that circle and swing,
Veering and mewing and clanging
Down into the face of the moveless town.

Fond is her playfellow man of old,
And they know something which is not told;
Few can divine in none can annal:
What if St. Ives herself were a gull?

Leave her alone, to pretend awhile
To sit there in stone with her age-long smile,
Useful and innocent, quiet and brave,
Her hair on the breeze and her feet in the wave.

Gulls know better. The time's not far,
When the keeper, lighting Gullrey star,
Will mark the wild back beating
But no lights answering over the bay.

Naught will be left of tricky St. Ives—
Tartlets or lotties, fishers or wices—
Naught of the flyaway town that would be
What she was to begin with—a bird of the sea.

—Louise Imogen Guiney in the November Century.

Evils of County Jails

That the prisons of this country are steadily progressing from bad to better, but that the ancient evil, the old barbarism, which makes the convict a worse man than he was before his sentence, still obtains in most of our county jails—this is the conclusion of Charles Edward Russell, one of the country's best known sociologists. Writing in the current number of Hampton's Magazine, in the course of that amazing series of articles upon our prison system which has been stirring up so much talk of late, Mr. Russell frankly says:

"If we are to reform our prison system, we should begin with the county jail, making, as the first step, an effort to show the public what all this costs—for the bill is heavy."

Mr. Russell cites many cases in point, among which is this ancient Cook County Jail, Chicago, Ill.:
When I visited it last winter there were 500 prisoners, or thereabouts. Of these 475 were awaiting trial. That is to say they were theoretically innocent men; nothing had been proved against them. But the remaining 25 were serving sentences for various offenses; they had been tried and found guilty. Yet those that had been found innocent were here on exactly the same footing, herded together, occupying the same cells, young and old indiscriminately mixed. A bright-faced

workingman charged with some light misdemeanor, and unable to get bail, was sleeping nightly in the same cell with a virulent old offender serving a year's sentence for breaking and entering. Friendless men whose crime against society consisted chiefly of an inability to find work when there was no work to be found were forced to associate with burglars and pickpockets.

And this is not all. There were prisoners in that jail that were not even charged with any offense, that had done no wrong, that had in a way offended society, but were only witnesses that we had locked up and forgotten. And these too were herded with the convicted criminals. One was a little (Irish boy, fifteen years old. He was a witness against a band of padrones accused of cruelty to children; that was all. He was not accused of anything, he had hurt nobody. But he spent months as a prisoner in that frightful place, because he happened to know something useful in the state. If he emerged thence without a liberal education in crime it was by a special interposition of Providence. Suppose that in those months of wholly unjust and measureless imprisonment he acquired the curriculum of evil and came forth to even the score by practicing what he had learned. Who in that case would be the real criminal? The boy or the County of Cook?

Tracing the Aztecs From Asia

Although a majority of the Indians of California have been found to be unique so far as comparison with tribes outside of the state is concerned, Prof. A. L. Kroeber, head of the department of anthropology of the California University, has started work on the gigantic task of tracing the coming of the Aztecs, the famous Mexican Indian tribe found near Los Angeles.

For many reasons the scientists have thought the famous Aztecs were related to the Mongolians and may have crossed from Asia thousands of years ago by the way of Bering Sea and thence wandered through the United States to the warmer climes of Central America, where they were found by Cortez and his Spaniards in the early part of the sixteenth century.

The discovery of the Indian tribe with a similar dialect near Los Angeles by Dr. Kroeber, who is an expert anthropologist and linguist, has aided materially in tracing the Aztecs northward, and the work will be carried on with this end in view.

Prof. Kroeber correlated with his work in tracing the lineage of the Aztecs the task of recording all the languages of the Indians of California. This has been nearly completed, and he has found that the total number of distinct aboriginal languages in California is now about 135. He has records of 92 different Indian tongues spoken within the confines of the state.

Of those of which no record has been made by the university, nearly all are extinct and forgotten. These comprise especially the dialect of the coast region of the southern half of the state. Occasionally a few Indians are still found who speak a language that has not been previously noted. Such a new dialect was only this month recorded by Prof. Kroeber from the Sacramento valley. It is likely that a few additional languages will yet be discovered, but in the main records have been gathered of all forms of speech that survive.—Berkeley (Cal.) Dispatch to the New York Herald.

Beauty and Utility In Parks

An examination of conditions elsewhere is one of the best ways of learning to appreciate conditions at home. That is being illustrated by the reports of a number of summer travelers from Chicago. One after another they return to praise the progress American cities have made in this direction or that. The latest word of this character comes from the president of the Lincoln Park board, whose opinion is that European parks are distinctly inferior to ours and much less frequented by the people, if used by the poorer classes at all.

Assuming possible bureaucracy in a report which includes the statement:

"The public park as we know it in America is unknown in Europe. The contrast between the 'royal garden,' even with its privileges for the public, and the American park, with its large area entirely free to the people, is worth noting. That there are extensive parks abroad, with great open fields over which visitors may roam at will is well known. There are royal preserves where freedom within reasonable limits is granted. There are also gardens where the restrictions are such as to reduce the pleasure of the visitor to the mere satisfaction of curiosity to learn what there is inside the fence.

The idea of beauty in American

parks is emphasized more and more all the time. But even more the idea of utility is being strength. The parks are being used as the breathing places and playgrounds for the masses. How rapidly the play theory is growing found expression in the 'Chicago Day' play festival. The best appeal for support for a park is its facilities for health-giving rest and recreation. The American city looks upon it as for the people. In the continental countries, there is a false strength in the guards, the 'day' the on-coming forces, the general atmosphere that the few rather than the many are to be favored. To that extent the American park idea marks a progressive advance. And the citizen of Chicago has much occasion for discontent with the splendid parks, which make their daily appeal to the thousands.—Chicago Tribune.

RUTHLESS RHYMES.

EXCISE.
Fudge, whose inventive brains
Kept evolving aeroplanes,
Fell from an enormous height
On my garden lawn last night.
Flinging in a Gaid sport,
Uncle arrested the police court.
MABEL.
Mabel's chronic inflammation
Led at length to amputation.
Oh, her cries were loud and deep!
I could scarcely get to sleep.
INCONVENIENCE.
I collided with some tripods.
In my swift De Dion Bouton,
Squashed them out as flat as Rippers.
Left them 'tossed more or motion'.
What a nuisance! Tripods and
I must now remand the car.
WASTE.
I had written to Aunt Abner,
Who was on a trip abroad,
When I heard she'd died of cramp,
Just too late to save the stamp.

MY RETIRING SALE

Why Not Magnify the Purchasing Power of Your American Dollar AT MY RETIRING SALE?

Where you can get practically \$2.00 worth for \$1.00. In common sense I ask, if you need the goods, can you make money any faster than that? For one solid week the shrewdest people have streamed into my place to grasp this opportunity, and for this, I heartily thank the community. For it demonstrates that they not only recognize the QUALITY of my GOODS (a fact which I have struggled to establish for the past twelve years among you), but also shows their implicit confidence in my statements regarding PRICE REDUCTIONS, which I have made sincerely and exactly in accordance with my advertising.

Just a few quotations as an example to show the reductions, everything else accordingly, as the whole must be sold.

OWNERS OF OIL WELLS INSIST ON GUARANTEE OF CASH; NO FORFEIT

Explanation of Failure to Close Sale of Lucile, Amy and Silver Tip—Active Work in Field—Only Apparent Falling Off in Shipments.

COALINGA, Oct. 23.—The reported sale of the Lucile, Amy and Silver Tip Oil Companies property has not been completed, according to the managers of these properties. Concerning W. F. Lay, who was negotiating the purchase, there is no doubt about his representing either English or Eastern capital. The proposition of securing an option upon the three properties appeared very good, up to the point of closing. The Lucile had its proposition framed, up so that it would have come through, and it may yet. The directors of the Silver Tip, entertained a proposition to sell their property for \$45,000, the payments to be made monthly. The conditions of the sale as expressed by the resolution adopted by the Board of Directors, at a meeting held for the purpose of considering this sale, were to the effect that there was to be no forfeiture clause in the contract of sale, but it was to be an absolute sale. The parties purchasing were required to give ample bond that the payments should be met with cash when due. This requirement was not met with favor by the purchasing parties, so negotiations for a sale were not completed as far as the Silver Tip was concerned. The proposition of the Amy Oil Company, as expressed by one of the directors, is about the same, the conditions of sale and the requirements being along the lines of those submitted by the Silver Tip. One of the directors stated that his company did not intend to sell the property without a substantial cash payment and a guarantee on the balance due. There seems to be no question but what this property could be purchased, but the owners will dictate price and terms, or no sale, as the property is valued with a good production.

ACTIVE SECTION 6.

Section 6-21-15 continues active. The Lucile is spudding in well No. 1. The California Oil & Gas company has lumber and rig material on the ground for well No. 2. The Jefferson is drilling on well No. 2, and making good progress. The Pacific States adjoining the Blue Moon on the west is building derrick and rig for well No. 1. The Los Angeles-Coalinga Oil Syndicate is drilling on well No. 1. The Blue Moon has about finished well No. 1. The gas and sand boomed some, all of which has been overcome. The Silver Tip well No. 1 has been making, and is now making, from 2,000 to 2,500 barrels daily. The Red Top is drilling on well No. 1 and is making very good headway. The De Luxe is about 2,500 feet deep with 6 1/2-inch casing and will soon be coming the producers. The Coalinga Aladdin well No. 1 is being deepened and will go ahead about thirty-four feet into

the rich oyster shell sand that the Amy is producing from. The Marial has shut off the water in well No. 1, and will now enter the oil sand. The Marion has the water shut off at about 2,050 feet, and will finish up in the oil sand. This is a very busy section and more wells are to be sunk by new companies that are forming.

DEVIL'S DEN DISTRICT.

The Devil's Den District operators report the district active. The Tres Serritos Oil Company, section 13-25-18, has built a full standard rig and is now prepared to drill to the lower sands. The Positive Oil Company, on the northeast quarter of section 21-25-18, has built a standard rig, and has let a contract to drill a hole 1,500 feet deep. Dougherty and Johnson, of Lemoore, have installed a heavy Keystone drilling rig on section 2-26-15, and will test this territory at once. The Devil's Den Consolidated, section 22-25-18, is drilling in shale with a very lively showing of gas and light oil, though as yet no oil sand has been entered. The Cosmo Oil Company, section 31-25-18, is 500 feet deep with 16-inch casing. Parr and Lovelace, representing Visalia parties, are operating on section 27-25-19, and are 325 feet deep with 70 feet of lively oil sand of about 16 degrees B. A full standard rig of heavy timbers went down last week to section 23-25-19, northwest quarter. The well-known driller, J. L. Lennon, will be field manager of the new company, now being formed. The Two Step Oil Company, section 17-25-18, has completed a well of fine domestic water and is installing a pumping plant to supply water to operators in that vicinity. This water is pronounced the best vein of water struck in that section of country. There are several light portable rigs in this district that will soon be replaced by the standard rig.

The September statement of the amount of oil shipped from this field, compiled by H. W. Dallas, Secretary of the Agency, shows a decrease in shipments for September, compared with last month. This was largely due to the taking off of one of the regular oil trains from this run. The September shipments, by pipe line and rail amounted to 1,237,312 barrels. The apparent falling off in production is accounted for in a large measure by the survey of the various earth reservoirs and pump holes on the property of each company. Heretofore this storage has been estimated. Secretary Dallas, desiring to have his work as close to "facts" as possible, has had every reservoir and pump hole surveyed from which oil is taken into account as "stocks," or storage, or

oil held over, and has found that the estimate was about 55,000 barrels over the "survey." This will explain a greater part of the claim of 60,000 barrels short in production for September.

WEST AND SOUTH SIDE.

The steady growth of the West Side and South Side fields is shown by the monthly statement, checking up of the various fields. Taken at midnight, September 30th—East Side field, 45 wells drilling, 18 drilling wells temporarily suspended; 218 producing wells with 14 producing wells temporarily suspended; 12 new rigs; 65,140 barrels in storage. West Side, 75 drilling wells, with 11 wells temporarily suspended; 294 wells producing, with 12 temporarily suspended; 25 new rigs; 44,016 barrels held on South Side, 15 wells drilling, with 2 temporarily suspended; eight new derricks. This means that there are 62 wells drilling on the east side, and 232 producing wells. On the West Side, there are 56 wells drilling, with 388 producing wells. On the South Side, there are 17 wells drilling. A total of 166 wells drilling; 598 wells producing, an average of over 100 barrels of oil per day for 365 days in the year, which amounts to about \$9,000,000 per annum.

The Associated Pipe Line Company is building two 55,000 barrel steel tanks at station No. 1, on the northeast quarter of section 17-25-18, and is being made for two more tanks, same capacity. At station "B", on southwest quarter of section 18-25-18, the company has two 55,000 barrel tanks and is making grade for the third tank. This station will serve as a distributing station, serving the Associated Transportation company's pipeline to Monterey Bay, and also, the Associated Pipe Line company to Port Costa.

The Kern Trading and Oil company is installing a large boiler plant on the southeast quarter of section 7-20-15, and will soon be developing. The Associated Pipe Line company, half S. P. and half Associated Oil Co., has established station No. 1 on the northeast corner of section 17-20-15. The work on the southwest quarter of section 18-25-18 is progressing nicely, with three rigs, two drilling and the third ready for the drillers.

The Zier Oil company section 1-26-14, is completing new buildings for a camp on the east eighty acres of the lease. The new wells, on the east eighty acres, are better producers than the wells on the west eighty acres, largely due to the advanced method of drilling, but usually due to the experience in handling wells in this formation and new tools that are up to the all well requirements of this era. New rig for well No. 13 is completed and will be rigged up this week.

The Blair Oil company's formation, section 14-21-15, in well No. 1, is tallying up with the formation in the wells on the West Side, south end, down to the first oil sand. The water has been cemented off and as soon as the cement has set will be finished. The company has taken the treasury stock off the market; the stock is active at 50 cents per share on the street.

NEWS OF THE TOWN.

The passenger business of the Southern Pacific Company from this station, amounted to \$12,000 for September, 1909, and for same period the freight

amounted to \$184,000, not including the heavy shipments of oil from this field for the Associated Oil Company and the Southern Pacific Company.

The building of the National Supply company, next west of Sullivan Grail, is progressing nicely. The side walls are up and joists laid for the second floor. The store room to be occupied by the National will be 40x150 feet; the next west store room will be 35x125 feet. The second floor will be occupied as an annex by the Sullivan with latest fittings for rooms, running water, hot and cold, baths and gas heat.

The Baird Oil company, section 24-22-18, on the east slope of the Kettleman Hills, is 1,100 feet deep with 12 1/2-inch casing; finished a water well at 300 feet and has secured a well of good water.

Wells Fargo Company's building, on the Southern Pacific right-of-way, opposite the A. P. May, Incorporated, is nearing completion and will add very much to the business appearance of Front street.

The Coalinga Crown Oil company, section 30-19-15, just north of the Main State lease, has completed the derrick and rig for well No. 1, and is now building cook-house and dwellings for the help.

The Silver Tip Oil company has elected directors: W. R. Guiberson, president; Z. L. Phelps, vice president and general manager; Jacob Zwang, H. A. Whalley, and E. H. Smith, directors; Auger, secretary.

The Coalinga Garage has purchased the business of J. H. Martin. The repair shop will be enlarged and a cement floor laid. Scott Blair, L. M. Dodson and J. W. Snyder are managers.

The Best Yet Oil company was organized last week with the following directors: O. D. Loftus, W. M. Hoffman, J. L. Gresham, Jacob Zwang, and R. M. Cook; to operate on section 18-21-15. Guy H. Salisbury, secretary. U. E. Methever, a San Francisco attorney, spent several days last week in the field in the interest of his clients, who are interested in Coalinga and the oil fields.

The Hub Oil company, section 22-21-15, is 550 feet deep with 8 1/2-inch casing; the formation is checking up with that of the Blair well on section 14-21-15.

NOTES IN THE FIELD.

The Commercial Petroleum company, section 31-19-15, has cemented off the water in well No. 8 by the Hays process. M. L. Wox is manager.

The British Consolidated Oil Corporation, Limited, section 12-20-14, has shut off the water in well No. 8, and will soon have the well on the beam.

The Coalinga Metropolis Oil company, section 26-19-15, has completed the seller under the derrick, will now spud in well No. 1.

The Guthrie Oil company, section 31-19-15, has elected directors: Gen. W. McNear, Jr., president, office at 289 Battery street, San Francisco. The Consolidated Oil company of Coalinga, lot 1, section 18-21-15, has spudded in well No. 1.

The Fifty-Seven Oil company, section 12-21-14, has tested the cement in well No. 1 and finds that the water is shut off.

The Acorn Oil company, section 2-20-14, is about 850 feet deep with 5 1/2-

inch casing.

The Standard Oil company, section 26-19-15, is about 500 feet deep in well No. 1 with 10 1/2-inch casing.

The Coalinga Unity Oil company, section 12-20-14, is rigging up on well No. 1. Jim Shreves will drill the well in.

The Marion Oil company, section 6-21-15, has tested the cement and find the water shut off; will now drill into the sand.

The Great Western Oil company, section 12-21-14, is over 600 feet deep with 12 1/2-inch casing on well No. 1.

The Echo Oil company section 2-22-17, has material on the ground for buildings and rig.

The Lucile Oil company, section 6-21-15, has spudded in well No. 4.

The New San Francisco Crude Oil company, section 6-20-15, is rigging up on well No. 8.

PERSONAL NOTES FROM WEST PARK

James Stall has returned home from San Francisco after having spent a very pleasant time at the Fortna festival.

Adam Pretzer, of Fresno, made a business trip to the colony on Monday last.

Mr. D. W. Haslam, who has been spending some time with relatives in the colony, returned to his home in Fresno on Wednesday.

R. W. Allen spent several days at the Fortna festival in San Francisco. The W. C. T. U. meets next Wednesday afternoon, October 27, with Mrs. Robert Rhea.

Miss Ethel Fawcett, of Fresno, spent Sunday at the home of J. A. Hollingshead.

Mr. Milton Hadian, of Fresno, visited friends and relatives in the colony on Sunday last.

Mr. E. W. Jagers, who has been quite sick, is on the improving list. The West Park Epworth League meets next Sunday evening, October 24, with Miss Lena Young as leader.

Albert Rice made a flying business trip to Coalinga on Thursday.

The West Park Thursday club meets with Mrs. E. G. Webb at her home, 150 Fortcamp avenue, next Thursday afternoon.

Kasper Rasmussen has sold his place on Braly avenue and is making preparations to go to Denmark soon.

Geo. Price had a valuable horse badly cut on a barbed wire fence on Thursday night.

J. E. Moon has rented the Abbey place on the corner of Muscat and Braly avenues and has moved there with his family.

Mrs. Albert Rice and children are spending a few days with Wm. Rice and family in American colony.

A 70-year-old stockman of Washington, D. C., was fined \$10 for smoking cigarettes, told the judge that he had been addicted to the habit for 60 years, that he was too old to quit and that he did not consider that it was any business of the state of Washington whether he smoked the deadly weed or not. The old chap was right. Better let him go on and smoke himself to death and be a horrible example to the rising generation.—Bakersfield Echo.

MANY CONTRACTS ARE SIGNED UP

Tielman People Secure 1000
Acres First Day.

Growers Doubtful at First
Are Caused to Sit Up
and Take Notice.

Saturday was a busy day at the 1-acre headquarters of the Central California Raisin Company. President Wiley M. Giffen was in charge almost the entire day and personally explained all the details of the plan to the many growers making inquiries. At the close of the day's work President Giffen stated that many contracts had been signed and that more had been accomplished since morning than he had hoped for. The exact acreage was not given out, but it was stated that on the day previous 1000 acres of vineyards had been signed and that Saturday's work would not suffer by comparison. "One thing that I like," said President Giffen, "is that the growers are

coming in and asking questions. Even the few who were skeptical at first about the plan being a success because of the experience of other organizations in the past have taken the trouble to drop in and talk the matter over with us. Many of these have promised to consider the advisability of coming into the land and a few of them have actually signed.

"Of course we cannot expect to secure 1000 acres every day. If we did we would have the required sixty-five per centage. But we expect to work right along and secure a certain number every day, and we are satisfied that everything will come out all right and that the organization will be effected."

Tomorrow President Giffen and Director S. J. Helsing of Selma will go to Hanford, where, in the afternoon at 10 o'clock, the second meeting of growers will be held at 2 o'clock. This meeting has been well advertised and it is expected that a large majority of the raisin growers will be in attendance to discuss the plan and select the director from Kings county to the board.

BIG FOUR STOCK FARM IS LEASED

Noted Tract Will Be Used
for Dairying.

Nebraska Men Investigate
Country Surrounding
Dos Palos.

One of the most important land deals of the past few days was that wherein the Big Four Stock Farm of 600 acres, and located on the Fresno Slough, was leased through the J. E. Mitchell Company to the Big Four Co-Operative Creamery Company, a corporation composed of men from various portions of the San Joaquin valley.

The farm is located in the center of one of the most fertile districts in this section. The company proposes to devote it to the dairy business and has already stocked it with some 125 cows, and horses sufficient to do the necessary work. In addition to this about 200 hogs have been purchased and will be allowed to multiply on the premises. It is the purpose of the company to equip the farm with the latest improved machinery and to convert it into one of the most up-to-date in the state.

ALFALFA LAND WANTED.

While the real estate business in Fresno has not been particularly brisk during the past week several small deals in alfalfa and raw land have been made both to easterners and local people. The land disposed of is mostly in the center of the most fertile districts in this section. The company proposes to devote it to the dairy business and has already stocked it with some 125 cows, and horses sufficient to do the necessary work. In addition to this about 200 hogs have been purchased and will be allowed to multiply on the premises. It is the purpose of the company to equip the farm with the latest improved machinery and to convert it into one of the most up-to-date in the state.

"Alfalfa land is in great demand just now," said one of the prominent real estate dealers. "All of the prospective settlers that have visited Fresno within the past month have been particularly anxious to be shown land that may be used for dairying purposes. That industry generally in the valley and will probably do more to settle the west side than anything else."

WILL PLANT EUCALYPTUS.

Land that may be utilized for eucalyptus is also somewhat in demand, and during the past week a Chicago company took an option on 1100 acres west of Caruthers and is figuring on planting the big tract to trees. Some talk is also being indulged in among dealers relative to prospective sales of this sort of land in Madera county, just across from the San Joaquin river, but so far no deal of a definite nature has been closed in that locality.

INVESTIGATING DOS PALOS LANDS.

Among the visitors to Fresno during the past week were two Nebraska men, registering as H. F. Gilbert and L. S.

Campbell, who were here to locate lands for a colony of prospective settlers from their state. The latter are said to be all practical farmers and are engaged at present in that business in their state. Should a report be rendered by the two agents upon their return to the effect that California offers better prospects for the future than Nebraska they propose to sell out their present holdings and come to this state. Investigations were made in the south, and this week Gilbert and Campbell visited the Dos Palos country and made inquiries as well as viewed personally the lands of that section. Upon their return they were non-committal as to what their report would be. They stated that the impression formed of the Dos Palos district was favorable, but they refused to draw comparisons with the south. They left for home Friday via the Sacramento valley, where they will make a short stop.

SELL RAW LANDS.

One of the important sales in raw land made this week was section 24, township 16, range 19, adjoining the townsite of Caruthers. This land was owned by W. W. Phillips, M. W. Muller, Judge Crichton and T. B. McKelvey of this city. They sold the land this week to J. R. McKinnis of Colorado Springs, J. C. Forkner of Los Angeles, W. T. Forkner of Selma and C. M. Hord of Kansas for the consideration of \$22,000.

The buyers of this land will immediately proceed to put in pumping plants upon same and improve a portion of it to alfalfa at once. A great deal of land has recently been changing hands at Caruthers. A short time ago a crowd of Kingsburg people organized a colony to plant a section of land in the vicinity of Caruthers to vines, trees and alfalfa.

DENIES MRS. EDDY PUPIL OF QUIMBY

Press Agent of Christian Science Leader
Says She Didn't Get Her Cult
from Him.

Editor Republican:—In your issue appeared a criticism of Mrs. Eddy that contains false statements and which therefore calls for correction.

It is surprising that any one should at this late date and in view of the court records on the subject make the statement that Mrs. Eddy acquired her knowledge of Christian Science from one Quimby.

A Massachusetts copyright court decision settles this matter. In Mrs. Eddy's favor for all time. In answer to this Mrs. Eddy offered to pay for the publication of the Quimby manuscript in order to prove that her teaching had nothing in common with Quimby's ideas. He was a hypnotist and those who know anything about Christian Science know that it is the polar opposite to hypnotism.

One who has even a slight knowledge of Christian Science knows that Mrs. Eddy does not claim to be the successor or equal of Quimby. In the preface to Science and Health with Key to the Scriptures, the Christian Science text book, she says on page 8: "Today, though rejoicing in some progress, she still finds herself a willing disciple at the heavenly gate waiting for the Mind of Christ."

In regard to the authenticity of cures made by Christian Science it may be said that none are published without proper data on file to prove them genuine. Any sincere seeker can obtain all the convincing proof necessary.

Mr. Peabody's statements in regard to Mrs. Eddy's finances show a woeful lack of familiarity with the facts. Through her laborious work in writing she has made considerable money, but has given practically all of it to advance the cause of Christian Science. Her sole purpose in life is to convince mankind that the gospel of Jesus, when rightly understood, is able to have to the uttermost. In this she has labored for more than forty years and the fruits of her labors manifested in purified and corrected lives as well as physical regeneration testify to the purity and usefulness of her life.

The charge that Mrs. Eddy abandoned her child is untrue, as is also the charge that Mrs. Eddy or her husband ever tried to injure any one. When mentioning the indictment against Asa G. Eddy Mr. Peabody conveniently forgets to state what is now a matter of public record, namely, that the indictment was the result of a malicious conspiracy concocted by a couple of jail birds and built upon perjury. This is made quite clear by the confession of George W. Eddy, an affidavit before a Taunton justice on December 17, 1878. The entire case collapsed without a hearing, being quashed by the district attorney.

Mrs. Eddy's life work is to bless all mankind and to lift the burden of earth's ills. Her work is not a selfish one, but a mission that her mission is successful. Those who have listened to Mr. Peabody's false and misleading statements should, in all fairness, read "The Real Mrs. Eddy" by Silver Willard. This is the only authentic biography published and presents a story of Mrs. Eddy's life in a simple straightforward way by one skilled in journalism and whose one desire was to get at the facts. This book can be found in the public library and should be read by all who desire to know the truth about Christian Science.

Sincerely yours,
WILLIAM E. BROWN,
Los Angeles, October 23, 1927.

M'CARTHY RECORD GIVEN IN WEEKLY

Union Labor Candidate Has Repeatedly
Put Himself Against San Francisco's Best Interest.

"McCarthy's Unsatisfactory Record" is an exposition in this week's California Weekly of the record of George W. McCarthy, Labor candidate for mayor of San Francisco, who repeatedly put himself on record against the best interests of the city.

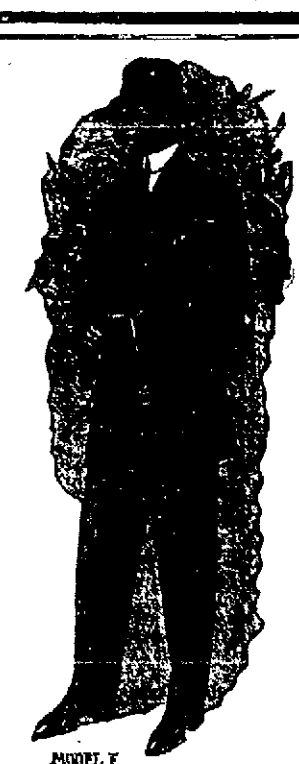

The fifth article appears on "American Slipping in American Ships" by George W. Eddy. This article discusses "What Other Nations Do to Help Their Shipping," especially the subsidies of Great Britain, Germany and France.

"Political Table Talk" covers the Melancon congress of Senator Bard's retirement, a change of Southern Pacific political bosses, and an independent ticket for supervisors of San Francisco. A. J. Waterhouse makes much and much in his editorial, "The San Francisco," is approaching conclusion in three romantic and dramatic chapters. The editorials cover the state and national subjects of interest with a keen and critical eye. The other departments are interesting.

THE ELKS BEG TO EXTEND HEARTY THANKS

Fresno Lodge No. 239, R. P. O. Elks desire to hereby return sincere thanks to Mayor Howell, Secretary Wm. Robertson and all who so kindly and generously lent their automobiles and their services in the reception tendered yesterday to the Los Angeles Lodge.

A. A. "ALLEN,"

HORSE GUILTY OF CRUELTY TO ITSELF

Strayed Away and Was Nearly Starved
When Humane Society Took
Pity on Animal.

J. Green and Edward Locke, who reside in the neighborhood of the Parental school, appeared before Judge Graham yesterday morning to answer to the complaint of the Fresno County Humane Society for cruelly treating a horse.

According to the testimony of Humane Officer Stafford, the horse was found on Friday evening on a vacant lot half starved and so weak that it could walk with difficulty, and was also suffering from a running sore on the foot.

Green told the court that he had made a present of the horse to Locke, the condition being that Locke should take care of the horse, feed it, and get it into good condition. Locke's excuse was that the horse had broken its halter, got away and he for three days had been searching for it. They prepared to take the horse to Dr. Williams, the veterinarian, and in so doing the horse was injured, and to have it killed. This course was satisfactory to Mr. Harvey and no further action will be taken.

PLEASANT SURPRISE PARTY.

A very pleasant surprise party was tendered Miss Annie Kanderzsky and Mona Christman at their home at 1741 F street on Tuesday evening. The surprise was cleverly planned and was complete. The time passed off rapidly in dancing and games. Miss Mary and Thomas Bone played several beautiful duets on the piano, accompanied by John Brannan on the violin. At a late hour refreshments were served and the crowd soon departed for their homes, wishing the surprised ladies many happy returns of the day.

Those who participated in the event were: Miss E. E. Johnston, Helen Arroy, Florence Eddy, Christine Fleming, Minnie and Josie Gallagher, Mary Bone, Hattie McDermott, Mary Kahl, Bertha and Mary Ruhl, Nora Bone, Agnes and Annie Kanderzsky, Mona Christman, Messrs. Lauren Johnson, Thomas Bone, Laura Melvin, August, Will and Frank Ruhl, John McLaugh, Val Jones, George Belfors, Martin Byvins, J. L. Robinson, Alfred and Will Kahl, Edward Fleming, John Brannan, John Wright, Joseph Kanderzsky, Mr. and Mrs. Will Ruhl, Mr. and Mrs. George Johnson, Mrs. Richardson, Mr. and Mrs. Dave Wright, Mrs. N. Jones, Mrs. Rogers, Mrs. M. Costa, Mrs. Conners, Mr. and Mrs. Frank Kanderzsky.

KUTNER COUPONS FLOWING INTO Y. W. C. A.

Friends and well wishers of the Y. W. C. A. are already sending in their Kutner coupons to the association room, and the prospects for the \$1000 prize are encouraging. Every coupon helps. Remember they can also be had on charge accounts.

CARD OF THANKS.

We take this means of expressing our best thanks to those who have helped to lighten our burden of sorrow by expressions of sympathy and beautiful floral offerings.

MR. O. O. CAHILL,
MRS. CLARA PALMER

THE BRUSH

The Brush Runabout supplies the demand for a motor vehicle which is serviceable, convenient, reliable, durable and economical to operate.

"The Brush" is so simple in its construction that the inexperienced layman can drive it and keep it in perfect condition.

"The Brush" is very strong in construction, has but few parts, is handsome in finish, and rides as easy as any common carriage.

Call and see them and have a demonstration.

A black and white photograph of a high-heeled boot, likely a riding boot, featuring a decorative brooch on the side and a small logo in the bottom right corner. The boot has a high shaft with four visible straps or buttons. The heel is a thick, dark block heel. The logo in the bottom right corner reads "Cavallo" above "MATERIA 100% COW".

AIRSHIP SERVICE FOR COMMERCIAL BUSINESS

German Naval Officer Would Employ Aviation Whenever Winds Are Constant—Proposes Observation of Currents—New Process for Steel Making—Sentimental German Maidens and Black Swans of the Colonies—Government Issues Warning to Families.

BERLIN, Oct. 23.—Writing in the current number of the Marine Rundschau, the semi-official organ of the German Admiralty, Senior Lieutenant von Mueller Berneck suggests the employment of airships as a means of observation wherever practicable. He suggests the task of ascertaining whether there are any regions where the wind blows for a considerable period in one direction, and where the meteorological conditions would allow an airship line to be established without danger.

He has discovered that such regions do exist, and instances the tract between Madeira and the Azores. In the months of March and May, he says, there are in the air, no storms or hurricanes, no rain, no dust, and practically no wind. The direction and strength of the wind remain steady, and all that is doubtful is whether the direction and force of the wind changes. In the higher strata of the atmosphere, the effect of the sun's rays on the gas is such that it is possible to establish an airship line to be established without danger.

The distance from Madeira to the Canary Islands could be traversed in 24 hours, and from there to the Azores and Cape Verde in 22 hours, that between Cape Verde and Barbados in 24 hours, and that between Barbados and the Panama Canal in 24 hours. The whole distance in this traverse, while a steamer requires 144 hours, voyages could, of course, be made only in one direction, and airships would have to be returned to the base by a steamer. The cost of such a service would be an advance of about 45 miles per hour.

WOULD SHORTEN TIME.

The distance from Madeira to the Canary Islands could be traversed in 24 hours, and from there to the Azores and Cape Verde in 22 hours, that between Cape Verde and Barbados in 24 hours, and that between Barbados and the Panama Canal in 24 hours. The whole distance in this traverse, while a steamer requires 144 hours, voyages could, of course, be made only in one direction, and airships would have to be returned to the base by a steamer. The cost of such a service would be an advance of about 45 miles per hour.

"DEAD MAN" REVIVES.

A workingman named Stover was discovered unconscious in the street in the city this morning, and was taken in a cab by a policeman to the nearest hospital.

The doctor, finding that the man's heart and pulse were motionless and the body stiff and cold, declared him to be dead. He was taken to the morgue, and after the usual rites had been performed, the body was placed in a coffin and taken to the cemetery. The next morning, however, the body was found in the morgue, and the doctor, finding that the man's heart and pulse were motionless and the body stiff and cold, declared him to be dead. He was taken to the morgue, and after the usual rites had been performed, the body was placed in a coffin and taken to the cemetery.

ELECTRIC FURNACE.

German iron and steel manufacturers are excited over the successful solution of the problem of making steel directly from iron ores by electrolysis.

This has occurred at Dornmühlheim, in the duchy of Luxembourg, where an electric furnace has been producing steel for a short time. Although the process used are not new, and contain

TIBURON FABLED TREASURE LURE OF ANOTHER GOLD SEEKING EXPEDITION

Island in Gulf of California Has Been Cause of Many Failures and Much Loss of Life and Money to Greedy Adventurers.

SAN FRANCISCO, Oct. 23.—It is effectively and disastrously held if the doesn't follow just because the North Pole has been discovered, there isn't anything mysterious about it. It is worth going to seek. For example, there is the island of Tiburon, in the Gulf of California. Never heard of it? Of course not. It is a small island, but it is said to contain more than 100,000 tons of gold. It is supposed to be a treasure island, and it is said to be the cause of many failures and much loss of life and money to greedy adventurers.

The expedition will gather at Bakersfield in early October and will proceed to the Gulf of California. The expedition will be led by a man named Jones, who is said to be a man of great wealth and power. The expedition will be a large one, and it is said to be the most ambitious expedition of the kind ever undertaken.

The island of Tiburon is said to be a treasure island, and it is said to be the cause of many failures and much loss of life and money to greedy adventurers. The expedition will be a large one, and it is said to be the most ambitious expedition of the kind ever undertaken.

CHURCH JEWELS STOLEN IN POLAND

Robber Secures Pearls and Other Gems Worth Millions from Image of the Virgin.

CZENSTOCHOWA, Russian Poland, Oct. 23.—During the night, robbers entered the chapel of the Panline convent here and despoiled the much revered image of the Virgin of the robe with its pearls, the diamond-studded crown and many votive offerings of jewels. The image, not damaged, the objects stolen have an intrinsic value of several million rubles. Today the chapel, which had closed up on the discovery of the outrage, was surrounded with armed troops, and praying men and women.

The convent at Czenstochowa is famous for its representation of the Virgin and attracts probably a quarter of a million pilgrims annually. Formerly it was strongly fortified.

PHYSICIANS PLAN RADIUM FACTORY

Expect to Increase Supply of Precious Element for Use in Fighting Cancer.

NEW YORK, Oct. 23.—A number of medical physicians and surgeons have announced the tentative organization of the American Radium Institute, to be devoted to the treatment of cancer and similar diseases. The object of the association is not commercial, and the association is not to be a factory for the production of radium, but a place where the element will be used in the treatment of cancer and similar diseases.

Supplies of pitch blende for manufacture are to be drawn from Colorado and other Western localities where the mineral is abundant. It is planned to have a factory in New York for the preparation of the radium. The first plant where patients are to be treated will be in this city, and it is considered probable that another will be established, possibly in Chicago.

The market price for radium is \$1,000 for ten milligrams, or approximately \$2,000 for a pound. The new institute plans to produce sufficient radium to be able to supply it to practitioners throughout the country. The scientists who place such great faith in radium and who are establishing the institute are not only physicians, but also chemists, and will devote much of their time to promoting the success of the affair.

COULD NOT UNDO HIS HYPNOTIC CONTROL

Student Puts Classmate Under Spell and Then Has to Call in Physician.

THE Coalinga National Petroleum Co.

Is offering you an opportunity that stands head and shoulders above any other proposition offered you in the Coalinga field. Its proposition is clean, safe, conservative and a sure money-maker.

DON'T LET THIS OPPORTUNITY SLIP

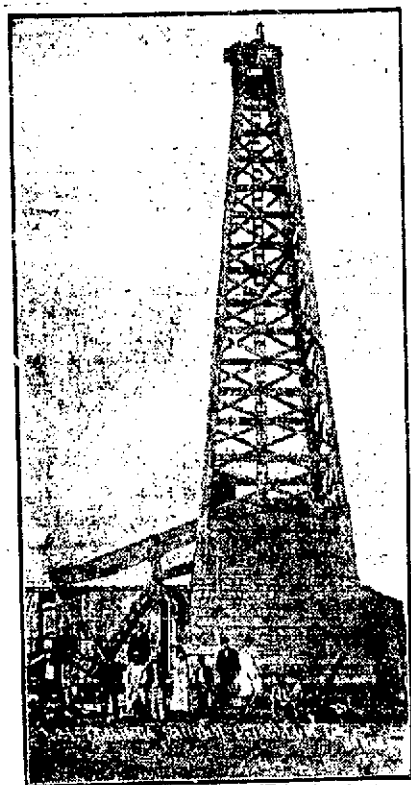

This opportunity to make big money, which we are now presenting to you, is fast slipping away.

Do as your neighbor has done, come in, investigate, and learn who your associates will be, then you will buy.

Don't be one of those who will say "I had the chance to buy Coalinga National Petroleum Co.'s shares at 35 cents, but failed to grasp the opportunity." "There is a tide in the affairs of men which taken at the flood leads on to fortune."

BUY NOW

WHILE THESE SHARES ARE 35c AS THEY WILL
SOON ADVANCE IN PRICE.

Well No. 1 of the Coalinga National Petroleum Co.

THE LAST BLOCK OF 35-CENT STOCK is now on the market and being rapidly subscribed.

WE ARE OPERATING UPON 80 acres of proven territory in the very center of the moderately deep proven territory of the Coalinga field, in which the papers are daily recording the bringing in of phenomenal wells and in which those who have invested judiciously are making immense fortunes.

THESE WELLS RANGE IN PRODUCTION from 500 to 2,500 barrels per day. The wonderful productiveness of this moderately deep field is attracting capital from all parts of the world.

IT IS A WELL KNOWN FACT that territory in the Coalinga field such as is being operated upon by the Coalinga National Petroleum Co.

is making immense profits for all who have invested therein.

THE COALINGA NATIONAL PETROLEUM CO'S. well number one was 728 FEET DEEP ON OCT. 20TH, 1909, and is being drilled by one of the most experienced and capable drillers in the field and is being drilled day and night.

You can readily see by the line of the United States Geological Survey that the Coalinga National Petroleum Company will penetrate the productive oil strata at the same depth as the wells of the Lucile, Silver Tip, American Petroleum Co. and all the large gusher wells of the Coalinga field.

THE FIELD MANAGEMENT of the Coalinga National Petroleum Co. is in the hands of Mr. S. R. Bowen, who for five years past has managed the Oil Well Supply Co. in Coalinga.

SUCH AN OPPORTUNITY for safe investment has never before been put before you. The Coalinga National Petroleum Co. is not a wild cat. It's a sure and safe investment. If you have any money to invest, now is the time; and the place to invest it is in shares of the Coalinga National Petroleum Co.

WHEN YOU BUY—BUY RIGHT. Every man who bought right in the good deep proven territory of the Coalinga field has made and is making big money. BUY NOW while the opportunity is yours. For further particulars call on

GEO. V. MARTIN, Sec. and Treas., 1141 J St., Fresno, Cal.

A. S. CLEARY, President, 112 Market St., San Francisco, Cal.

S. R. BOWEN, Vice President, Coalinga, Cal.

The above cuts show well No. 1 of the M. K. T., which was furnished with a 3-inch pipe and produced over 2000 barrels during the first 24 hours and many days thereafter did 1000 barrels.

This well is just south of the Coalinga National Petroleum Co.

FOR SALE—Real Estate

FOR SALE—A portion of flat rich land in the northern part of Tulare county. There is not a kind of a waste in the county. The area is about 100 acres, well divided into 100 lots, and there is not even a trace of alkali in it. It is called a perfect bottom, being the sugar-belt land, and also the best for alfalfa, hay, cereals, and nearly every kind of orchard or vineyard. Accepting current price \$30 an acre, terms by cash, balance 1 and 2 years.

THE READER will wonder why such land as this, if as good as advertised, is not being offered at such a price. There are two reasons: It is in a new district, not much developed yet. It is 1/2 mile from the railroad, and the cash payment required is heavy. The land is really worth \$150 an acre now, and will soon be \$200. Apply to Owner, Box 1, Republican.

FOR SALE—10 acres improved. Must be sold once. Write A. D. Box 27, Republican.

60x125 EPIRE STREET, 1400. These lots are inside city limits and have city improvements. Owner makes this price for quick sale.

EWING-MCDANIEL CO., 1024 J St.

FOR SALE—House and grounds, 50x150, near Blackstone Ave., car line, \$200, easy terms, pay monthly.

ANOTHER WITH small house, 50x150, 2 lots, 50x150 feet, \$400.

THE LOTS above are worth much more than we are asking for the places.

LEE E. LUCAS, 1138-1140 J St.

40 ACRES 5 miles from Fresno, 55 acres Muld and Lovell peaches 2 to 5 years old, 5 acres alfalfa, balance ready to plant. 7 room house and furniture, tank house, good barn and outbuildings. 1 top buggy and harness, 1 cow and chickens, all implements, trawls and boxes. Price \$6000.

CHAS. ERIKSSON, 1140 J St.

FOR SALE—230 EPIRE St., new modern 5 room cottage with bath, 45 feet front, shade and fruit trees, lawn and barn.

THIS IS A BARGAIN

FOR SALE—40 acres all improved flat bottom land, best producing in the county. Trays, sweet boxes, house, good barn, good shade, water right, best location. Price \$5000, \$2500 cash, balance yearly payments. Owner must sell.

ELIAS BRUN, 1140 J St.

FOR SALE—15 acres in bearing, 230 EPIRE St., Easy terms. Owner, Box 230, Sanjour, Cal.

FOR SALE—50 acres, all in alfalfa, house, barn and stock. Terms.

WE HAVE a good lot of orchards and vineyards, 10, 20 and 30 acre tracts, that are good values. Let us tell you about them.

CHRISTIANSEN & HENRIKSEN, 1140 J St.

WANTED—A rabbit vineyard, fruit or dairy ranch in exchange for a merchandise proposition doing good business and will be investigated.

CHRISTIANSEN & HENRIKSEN, 1140 J St.

BY OWNER—50 acres raisin vineyard near Lone Star. Fine location, good land. Must sell. Bargain. \$2500.

FOR SALE—City property on terms if desired. Houses for rent at

GILLIE, 1442 Fresno St.

40 ACRES 5 miles from town, nicely improved, house, barn, windmill and tank, trees and vines on part of it. Good bargain. \$4500.

HOOKWORMS ALARM COLLEGE OFFICERS

University of Georgia Students Rendered Sluggish
By Remarkable Scourge.

ATHENS, Ga., Oct. 23.—The prevalence of the hookworm, which certain scientists have ascribed as the cause of laziness among the students of the University of Georgia, is causing the faculty alarm, and a campaign has been determined upon to eradicate the parasite.

Dr. J. C. Bloomfield, president of the City Board of Health, has been examining the students at the request of the faculty, and he reports that at least 30 per cent are suffering from the hookworm. Many examined, Dr. Bloomfield states, are members of wealthy families, which, in his opinion, discredits the belief that the disease is prevalent only among the poorer classes.

Some afflicted with the hookworm are members of the university football team, and the physicians say the hookworm undoubtedly is responsible for the poor showing the team is making, as one effect of the parasite is extreme physical sluggishness.

Since Dr. Bloomfield's report, the faculty has been looking into the class standing of those afflicted, and in every case it is lower than those free from the hookworm.

MISSIONARY FOUNDS STRANGE UTOPIA

(Continued from Page 1.)

His victim had suspected. Down in the States Dr. Driggs was a man without a country. He had changed and the world had changed during his long sojourn in the north.

CIVILIZATION JARS.

Old fellows had long since passed away. Old associations were broken up. Coming from a simple society, the ways of civilized society jarred on him. So he spent the year writing a book and dreaming of an Eskimo Utopia in which he and his people might start all over again and in which the primitive communism of those kindly people could flourish again.

With the opening of northern navigation Dr. Driggs was once more on his way to the Arctic. He laid with him lumber and tools and provisions—all that his scanty savings of many years could buy. At Point Hope he came ashore and laid his plans before his people.

Sixty of them signified their willingness to join him. Owing to the incessant gales that sweep around Cape Lisburne and the perpendicular rock walls that fringe the shore for many miles there, the country is uninhabited. In fact the Eskimos have a superstitious dread of the place, but they have faith in their old leader.

The success of the colony is a matter for conjecture; but it has much in its favor, notwithstanding its location. In the first place it is isolated and can hardly be spoiled by contamination. In the second place the Eskimos, like almost all primitive peoples, are naturally communistic.

Nor will they be starved out. Off at sea is the finest whaling ground in the Arctic. Among the ice floes seals abound, while polar bears are very plentiful. On land the white fox, the lynx and the ermine are everywhere; and there are many caribou back in the interior. Every spring the rocks that overhang the sea are alive with wild fowl; every description and eggs may be gathered by the hundred. In fact, it would be difficult to find a more fortunate place or a place more suited to the purposes of its founder than the site chosen for this colony.

Every summer when the ice opens up and the ships come in the furs and whalebone that have been taken during the year will be traded off or shipped out to pay for the cloth and flour that must be shipped in. All will share alike in the little community. There will be no one to make a profit on any transaction.

SINCERITY UNQUESTIONED.

This is the dream of the founder, and those who know the spirit of the doctor do not question his sincerity. To him riches and the necessities of civilized society are repulsive. It is in the heart of the old communistic Eskimo society that this old man is at home and happy. It is to save a portion of this old society in its primitive simplicity that he has taken his people ninety miles away from the nearest settlement and planted his colony in the loneliest place in the world.

Before leaving the civilized world Dr. Driggs superintended the publication of his book, "Tales from Oldest America." It is a story of his people, their history and their mythical yarns which the old missionary often heard told by the light of the seal oil lamps as he sat and smoked with them in their igloo here. He expected that the publication of this book would bring in funds to help his colony, but in this he was sadly disappointed.

This in brief is the story of the founding of the world's latest little Utopia. Like many a promising project it will doubtless succumb when the waves of modern life begin to heat around and upon it in earnest.

"As long as there is food no one will starve," said Dr. Driggs, as he bade his friends good-bye. "If there is no food, we will starve well all together."—He added with entire sincerity.

—Correspondence of New York Post.

PRAGUE'S MUNICIPAL RAILWAY SYSTEM.

Consul Joseph I. Brittain writes of the workings of the street railways of Prague:

The net receipts of the municipally-managed street railways of this Bohemian city for the eleven weeks ended with 1903, after paying heavy interest on borrowed capital, were \$629,371. The gross receipts in 1903 amounted to \$1,655,372, and the net profit to \$273,145, against \$118,145 in 1902. Among the expenses in 1903 were \$37,715 paid as pensions to aged and sick workmen and those injured in the discharge of their duty, and \$65,475 in tolls for the privilege of crossing five bridges over the Moldau.

Four of the bridges are without street car tracks. During 1903 there were 370 collisions with cars and other objects, in which two persons were killed and 155 injured. The total length of the street railway lines is a little more than 26 miles, and this year several miles of new track are being built, giving service to other parts of the city. In all there are 232 motor cars, 122 trailers and six snow plows. The cars have a total seating capacity of 5604.—From a Consular Report.

LONG ENOUGH.

Transient—Kindly tell me whether this ticket will allow me to stop over here?

Station Agent—It depends. What do you want to stop for?

Transient—To visit some distant relatives of mine, the Jinkses.

Station Agent—The Jinkses have plenty of time. This ticket is good for the next train.

Transient—See here! Do you know how long I intend to stop?

Station Agent—Not exactly. But I know the Jinkses. From Fock.

QUALITY COLONY

NO BETTER SOIL ANYWHERE

All that the name implies. The soil is Quality soil and will grow prolifically all varieties of Grapes, Peaches, Figs and other Fruits For which Fresno County is famous

We again call your attention to Quality Colony and urge quick buying as there is just a small portion of this excellent tract to be sold. No better soil could be found anywhere. Some of the most flourishing orchards and vineyards now surround Quality Colony. You just have to take a trip out there and see for yourself. The beauty about this rich soil is that it is not only adapted to the producing of grapes, but also to peaches, figs and other fruits. This land is selling at \$80 an acre but it is well worth \$100. It is located 13 miles east of Fresno, within two miles of Sanger, thereby giving very close shipping facilities. It is the best land obtainable in Fresno County at this price, and the best land is always the cheapest in the end.

Prizes For Unkissed Girls

There are glum faces amongst the young men of Iowa and mischievous smiles amongst the girls. The Governor will be glad to buy a few of those prizes, but what of the poor young men who are hanging for a regulatory practice in Yankee parlance, they have also got to be on hand.

They have persuaded another medical authority to declare that "in the act of kissing we encounter only bacteria and germs," and that "the advantage of kissing outweighs its hygienic risk, for it provides us with microbes useful for indigestion."

MUST NOT KISS ON THE BEACH.

Thus we shall have Edwin asking Angelina, when she reads his chaotic salute "on the ground that she wants to win a five-pound prize, whether it is worth while making her digestion for such a sum. And with the love-light reflected in each other's eyes, it will be odd on Edwin getting all the kisses he wants.

Iowa, however, has not yet followed the example of Atlantic City, New Jersey, where fines for kissing on the beach have been instituted.

There is a great deal too much promiscuous flirtation and spooning on the beach, say the authorities. Several offenders have been fined three pounds each, will be brought up "unkissed and un-kissed."

This is all very well for the girls, who are sweetly smiling in anticipation of the fruits and favors, but what of the poor young men who are hanging for a regulatory practice in Yankee parlance, they have also got to be on hand.

They have persuaded another medical authority to declare that "in the act of kissing we encounter only bacteria and germs," and that "the advantage of kissing outweighs its hygienic risk, for it provides us with microbes useful for indigestion."

There is a great deal too much promiscuous flirtation and spooning on the beach, say the authorities. Several offenders have been fined three pounds each, will be brought up "unkissed and un-kissed."

One defendant pleaded that he was

Key West Not Good Naval Base

The hurricane that centered so destructively off the southern coast of Florida must tend to destroy the claims advanced for Key West as an adequate base of naval operations. The navy seems to enjoy special advantages for its operations in a great degree these advantages. The government has already spent large sums in its development, and while its usefulness as a base for naval operations is proved, its strategic value in war is indubitable. Any further attempt, therefore, to force Key West into an unwarranted position should be resisted as wasteful and unfortunate.—New York Herald.

The first necessities of primary naval bases are protected anchorages, fuel, food and other necessities. Key West possesses none of these and an attempt to create them artificially would demand enormous appropriations. It is in such respects inferior to several other gulf ports, though none of them possess at the best, be classed as other than minor military situations.

The strategic base of the first importance for the navy is the harbor of the Atlantic City, New Jersey, where the harbor is the best, for example, where only kissed by his wife, and that they were on their honeymoon. The Recorder, however, sternly maintained that the beach was no place for kissing.

This great war basin and its outlets may be patrolled and the entrances to the Panama Canal be defended, Gunboats, with its neighboring waters, satisfy in a great degree these requirements. The government has already spent large sums in its development, and while its usefulness as a base for naval operations is proved, its strategic value in war is indubitable. Any further attempt, therefore, to force Key West into an unwarranted position should be resisted as wasteful and unfortunate.—New York Herald.

The Recorder, however, sternly maintained that the beach was no place for kissing.

The great Iron Viaduct of Foles is said to be the highest in the world. It is 132 meters in height, or nearly 440 feet. Over it will pass trains from St. Elvire to Volvic, passing over the valley of St. Elvire. The work has been completed, and the strength of the structure tested. The test consisted of sending across the bridge, drawn by two American locomotives, a train 260 meters in length, consisting of 30 great wagons laden with coals. The total weight of the train was 1,102,000 kilograms, a kilogram being 2.2 pounds.—London Globe.

Dr. Sarah Pugh, Osteopathic Physician, 150 Forsyth Bldg. Main 4th.

Pinchot and Land Grabbers

John L. Matthews is a man who has got ahead of history. For newspaper readers the Pinchot-Bullinger controversy is not thirty days old, but the editors of Hampton's Magazine saw the controversy coming before it ever arrived, and in the latter part of March, 1903, they published a story of the situation which they knew was sure soon to lead to this Pinchot-Bullinger duel. The result of this is, in the current Hampton's a fearless exposure of the Waters-Power Trust, and the reforming Water Trust.

Mr. Matthews gives instructive facts and authentic figures to show that the Pinchot-Bullinger controversy is a question addressed to you by the attorney. He makes it clear that the fortune belongs by right to the people. And then he points out that the people are in danger of being deceived if it is in favor of the Trust.

"All questions of course, greater than Pinchot or Bullinger. The great question is that of watering the desert, freely, under public control, or of putting water for irrigation along with water for power into the water-trusted hands of the water monopoly.

"The grumbling forces have lined up against Mr. Bullinger. He represents their point of view.

"Hanging it all, Matthews," he said to me in his office in Washington, "you conservation fellows don't know anything about the West. This big public domain, this immense forest reserve, is a burden upon the people or there. The only way to handle it is to divide it up among the big corporations which are able to develop it, and let the people get the benefit of the increased circulation of money."

"I have no doubt," comments the writer in Hampton's, "that that statement honestly represents the opinion of Mr. Bullinger and his friends."

Here the Judge took a hand in the examination of the controversy. "You don't seem to understand the question addressed to you by the attorney," he said. "What they want to know is whether you have formed or expressed any opinion in this case. That is to say, have you told anybody whether or not you believe the defendant 'guilty of the crime charged against him, or have you said to anybody that you believe him to be innocent?"

"Course not, Judge," answered the conservationist. "It ain't necessary for me to express an opinion about him. I've known him for twenty years, and I know him well to be sure the cow."

"That will do, Mr. Skiles, you may stand aside."—From the Chicago Tribune.
